BOSTON, FRIDAY, JUNE 29, 1928-VOL. XV, NO. 181

SEIZURES NOT USED AS TREATY "BAIT," AMERICA ANSWERS

Washington Surprised at Tenor of Lord Curzon's Remarks on 12-Mile Limit

Seizures Will Continue and Rest of Matter Goes to Congress, Is New Official Attitude

WASHINGTON, June 29 (A)-Great Britain's flat rejection of the American proposal for a prohibition 12-mile limit has left Administration officials no alternative, it was said authoritatively today, but to await the will of Congress as to revision of the law, and meanwhile to refuse admittance to ship liquor stores under penalty of

Formal comment on Foreign Secretary Lord Curzon's announcement in Parliament yesterday was not available, the Washington Government having received no official report on the subject and no reply through diplomatic channels to its treaty proposals. There is no doubt, however that Marquess Curzon's implication that the ship liquor issue was raised by the United States to afford a lever-age for a treaty agreement on rum smuggling is not in accordance with the facts as they are understood by Washington officials. In the American viewpoint the two matters have nothing to do with each other.

Blame Foreign Companies

It is pointed out that the cases which resulted in the recent Supreme Court decision, prohibiting of liquor carriage by foreign ships in American waters, resulted from the initiative of filing injunction suits against Treasury officials.

Up to the time that the fears of the foreign ship companies as to the legality of carrying liquor stores drew out the "bone dry" opinion from Harry M. Daugherty, Attorney-General, it is said, there was no action contemplated to curb the movement of such stores. On the other hand, liquor smuggling from British and other ships hovering outside the three-mile limit was even then a difficult problem of law enforcement for the American Govern-

deal with both questions it is further declared, was due wholly to the fact that both situations were resulting in inconvenience to the governments at the same time, and that it was hoped the videning was being as undesirable as it is in the fact that it was hoped the videning was hetween the Alliest the videning was hetween the Alliest to remove at one stroke all likelihood of future friction.

Flat rejection of the 12-mile phase of the American plan makes it very doubtful in the American viewpoint that the ship liquor situation can be dealt with alone. At any rate there is reason to believe that the Administration is not considering any plan to deal with it alone, except as Congress may elect to take it up when the next session convenes.

Defend 12-Mile Law

agree that international law or legitimate traffic could in any wise be fected by the 12-mile proposal. They take the position that under the plan no ship bound on a legitimate errand into American waters would be in anywise affected. The only traffic aimed at was that illicit business of ships which come within 12 miles but not within three miles of the Amer-

By British legal precedents it is declared, a ship which lies outside the three-mile limit, but sends her cargo ashore in her own boats, becomes sub ject to domestic law. Recently, in the American federal courts, it was held that a ship which began outside the three-mile limit an unloading opera-tion, which was continued within the three-mile limit, similarly was amenahle to domestic law, whether she used her own boats or not.

Greek War Minister CO-OPERATIVE IDEA CITED BY PRESIDENT TO AID CONSUMERS

Mr. Harding, at Idaho Falls, Outlines Loan Plan to Link Buyer and Seller

IDAHO FALLS, Ida., June 29
(AP)—Declaring that the need of the present is to shorten the bridge between producer and consumer, President Harding in an address here vesterday proposed a plan of co-operation among consumers financed in part at least through a carefully organized and among provided adaptation of the basis. and supervised adaptation of the basis and practices of the savings bank or the building and loan society. Out-lining his plan, Mr. Harding said in

We realize that the real producer, under our elaborate and costly system of distribution, is not permitted a fair share of his product for his own use and enjoyment. We have become con-vinced that somehow our system of dis-tribution has grown too cumbersome. too costly, too complex, too indirect, too unrelated to the interests of real producers and legitimate consumers. We must find methods to take up as much as possible of the slack in the long line between producer and consumer; to give the producer a better share in that which he furnishes to the community.

which he furnishes to the community, and to enable the consumer to meet his requirements at reasonable cost.

To this end many experiments have been made in co-operative production, transportation, distribution and purchasing. To a great extent, these experiments have proceeded from the enterprise and initiative of the western people, to whom these problems have presented themselves with especial insistence.

Lower Living Cost Motivates

Developments of the last generation have brought the instrumentalities of transportation, of finance, of corporate organization, and operation into a closer harmony with the true public interest than ever before. The Government has sought to make itself helpful, to point the way, to remove ancient barriers of custom or tradition, and to cust the custom or tradition, and to curb the excessive demands of privilege, in order to cheapen for the great public many of the services which fermerly were dominated by the private interests and operated with too exclusive a considera-

tion for private profit.

Anything tending to break down personal initiative, to destroy enterprise sonal initiative, to destroy enterprise and ambition, must not enter into any program which can hope for the approval of the American people. Ours is an individualistic society and we want it to remain so. We want this Republic to remain always the land of opportunity wherein every man's abilities and usefulness shall measure his represented. ties and usefulness shall measure his personal advancement and prosperity. The kind of a program to encourage co-operation and co-ordination which I have in mind would not interfere with the freedom of proper opportunity: rather, it would emance the individual change to better his jadividual fortune. The need of this time is to shorten the bridge between producer and consumer, and to reduce the toil that must be paid for passing over it. We all know a good, deal about the various co-operative societies, associations and

co-operative societies, associations and corporations which have undertaken, in many cases with notable success, to improve the position of the agricultural producers. Such organizations have been successful in all parts of this country and in many parts of the Old World. They have already done a great work and taught us many valuable lessons. Where there are obstacles, imposed by unfortunate statutes of public policies,

Ruralists Are Pointing Way

On the whole, I think the agricultural community has been more alive to the promotion of its interests along these lines than has the urban community. terest lay, and have been more prompt and energetic in adopting measures to promote them, than the people of the city and town have been.

There is need to have working and

practical co-operative associatio practical co-operative associations of producers in the country, and at the same time to have equally effective co-operations among the consuming communities of the cities and towns; and, finally, to link these two sets of co-operators together in a co-ordination for mutual advantage to both. I believe it is possible and alterather described America yearly. Further, Italy would favor the investment of American capital in Italian enterprises.

ANTWERP GETS RUBENS PICTURE

By Special Cable

BRUSSELS, June 29—The Antwerp Museum has just acquired another picture. The substitution at the lowest possible expense.

We have in recent years given much attention to developing a system of agricultural finance, particularly adapted agricultural finance, particularly adapted to the needs of American farm producers. Some critics have indeed protested that it was class legislation. Perhaps it was; but as I suggested in discussing the problems of agriculture in Kansas the other day, it was in the interest of a vitally important section of the community which has heretofore had altogether too little consideration. Not only have I no apology for what has been done in the interest of the agricultural community; not only do I regard it as one of the monumental achievements of the last generation in developing our country's institutions—but I venture that we might with profit to the whole people consider the possibility of effecting an analogous organization to promote and encourage, POCATELLO, Ida., June 29 (P)—De-claring that the American people felt the position of the President as "ought to give of their influence to" set forth in his St. Louis speech was

a proper organization of the consuming community in both cities and country. Congressional Action Forecast

yesterday carried into Idaho, the stronghold of Senator William E. Borah (R.), an urgent appeal for American membership in the World Court.

Mr. Harding added that he "would a thousand times rather intrust the adjustment of a dispute, in which America is interested, to the Permanent Court of International Justice with American representation thereon, than to any arbitration hold set up to the content of the Congress measures way whatsoever."

"As I understand the President's I have not attempted to work out even an outline, much less the details of such a system; but I believe it is possible, feasible and certain to command the sympathy of men and the sympathy of men and the country at heart; I hope to be able, as the result of studies and interested with the League of Nations in any way whatsoever." even an outline, much less the details of such a system; but I believe it is possible, feasible and certain to command the sympathy of men and women who have the true interest of the country at heart. I hope to be taken to Ellis Island, where 79 immigration agents will decide whether they shall be permitted to land on United States soil. Seventeen of the vessels, carrying nearly 14,000 passengers in all, are due to arrive on Sunday, and the rest will dock the following day.

It is a big and pregnant subject to which no thinking man or woman can deny the fullest and most careful consideration. My thought is that the Government should give the largest encouragement, consistent with sound (Continued on Page 2, Column 6)

BRITISH LIBERALS FOR BIG AIR FORCE

Considerable Discussion Arises Over Statement Regarding "Superiority of French"

By Cable from Monitor Bureau LONDON, June 29 Considerable discussion is arising here over the statement, "the superiority of the French air force is a fiction," made by Frank Rose, M. P., at the Labor Party conference yesterday. The actual figures, according to statements in Parliament last March were: France 1260 military airplanes, Great Britain 371. Approximately three-quarters of French machines are in France and two-thirds of the British machines overseas.

It is a strange sign of the times that the Liberal section of the press formerly the chief exponents of the "little navy" theory—is today the most insistent on the necessity of Britain's remedying this inferiority. Not that anyone here wishes to enter into an air armament race. Stanley Baldwin, the Premier,

or in the way of expanding such activi- lowing for any increase already or ITALIAN PREMIER

ties as these, they might well be gradhereafter decided on by that country.

As long ago as April, a writer in
helpfulness and encouragement.

the Dally Telegraph stated that he had the Daily Telegraph stated that he had been informed in Paris on "high offi-cial authority" that it had been arranged during the current year to raise the number of squadrons from 140 to 220, of 10 machines each, while a speaker in the French Chamber yesterday, in a discussion on credits for the air service, called attention the fact that the sum demanded had been very largely increased at the last moment.

Germany Fulfills Promise The French War Minister, during the course of the debate, declared it was necessary that the number of French machines should be increased, as Germany was known to be concentrating all its efforts on creating an air force

It will be remembered that under the Treaty of Versailles the "armed forces of Germany must not include cording to the allied control commis sion, Germany has complied with this condition, and if this is so France can

its first session last night. Native Sons Hall was packed with the educators from more than 50 nations. The hall was resplendent with myriad flags, a fitting setting as greetings were brought from the far corners of the globe. But the meeting itself was united upon the ground of a common hatred of war and a common eagerness to work for peace.

From a political point of view the gathering comprised an international mixture that would have wrecked a meeting animated by lesser ideals. But Chinese, and Japanese, German, French, English and ardent Indian nationalists laid their differences on the table and set about the serious business of working with one another toward a better world understanding. Political power, to be sure, was lacking. Lacking also was political palaver. But a power greater than politics.

until American education is accorded full cabinet representation?" Miss charl Ormond Williams, past president of the association and its present field secretary to when this apparatus.

Lacking also was political palaver. But a power greater than politics was represented. The meeting last night represented the controlling factors in the development of the world's education. And they were an embattled throng of educators meeting the tled throng of educators, meeting to take up some of the problems which politicians in the post-war world have bungled.

"We have learned," said Miss Charl have just begun at fight," she replied, adding:

I have felt the pulse of the people on this question. They are for the Towner-Sterling Bill. The people elect the congressmen who are intrusted with unless they are taught to do so. We and the teachers of the world are resolved that henceforth we will refuse, forever, to furnish that kind of instruction."

Applause was unsparing for expres-

sions such as that. In fact, it was the applause which indicated most clearly the center of the meeting's interest. "War Shall Be Outlawed"

passage of the measure. As field secretary I am making a comprehensive campaign of the 48 states to determine precisely what these gentlemen are thinking. I have sent out 12,000 letters, 15,000 pieces of literature, made 25 field trips in 16 states and held 700 conferences, throughout the United States to check up every United States senato rand representative and a complete refile of this information is made every three months. into an air armament race.

INVITATION TO JOIN

Stanley Baldwin, the Premier, in announcing an increase of 1st areast control to the British air forces, explicating the strength of air armament would gladly cooperate with other governments of next year in Rome, at ments on lines similar to the Washington treaty in the case of the navy."

Acceptable of this information is made every three months.

I therefore say with authority that the conscientious congressman and the position and like are turning up for the Towner-Sterling bith Opposition comes from certain capitalism the conscientious congressman and the objection and like are turning up for the Towner-Sterling bith Opposition comes from certain capitalism the conscientious congressman and the conscientious congressman Virginia 1 3-10 years is the average tenure for the restless teacher. Teaching is not a job but a profession and most teachers have a lot to learn about their profession. Today the south is making more rapid of education the conference may

Today the south is making more rapid progress in modern forms of education the conference may progress in modern forms of education than any other section in the Union. It has come up from behind. Until 1873, for instance, Tennessee had no public school system. Unfettered by tradition, however, the southern schools have swung into line much quicker than have those in New England, which seems irretrievably committed to the township plan. The south has grown out of the old district unit of administration into the larger county unit.

The county unit of school administration supported by state and federal aid is the structure upon which futures school systems will be built. Educational individualism obtains in New England and the east. A public school bound by tradition becomes a self-centered in stitution, a self-satisfied, partisan unit. Now education as yisioned by the National Education Association in its American school program cannot succeed until it breaks up this feudal system in our schools. It is trite to talk about team play but that is exactly what American education needs most.

We cannot forget that there are sinister influences at work in American Schools Improving.

It has come up from behind. Until 1816, it is trite to talk about team play but that is exactly what American education needs most.

WESTERVILLE, O., June 29 (Special)—The three-day conference of the limit is recommended if it be found

The time has come, reads another paragraph of the declaration, when the people of the United States should assert their rights to require the citizens of foreign nations residing within tic policy adopted after a struggle of more than half a century. Other sug-gestions are that allens convicted of violating prohibition laws should be deported, that forgers of federal perand respect for the Constitution at mits should be penalized, and that stake, the opposing forces are drawn up for the supreme struggle," the declaration reads.

We provided that torgets of the constitution at mits should be penalized, and that federal prohibition agents should be placed under civil service and redeclaration reads.

> savings accounts of more than \$2,000,000,000 under national prohibition, increased attendance at schools and colleges, unprecedented building of 6000 new homes a month, 3000 new church members added daily, and all that pertains to the public and moral welfare strengthened," says another

paragraph. The effort to weaken the national prohibition code by a light wine and beer amendment should be defeated, continues the statement. It is an effort to make the prohibition law nonenforceable and pave the way for its repeal. We advise that both in state and federal legislation no more regucoholic products than are necessary to prevent them from being diverte to unlawful purposes, the statement

continues. An intensive campaign should be carried on in every state to secure and maintain effective prohibition laws and bring about their enforcement through state and local officers. We call upon all patriotic citizens to accept the challenge of the outlawed liquor interests who declare they will defeat every senator and congressman and state legislator who has been loval to his oath of office in voting for the legislation necessary to make the Eighteenth Amendment efficient, it

declaration expresses sympathy for the families of more than 30 federal prohibition agents, and the many families of state and local officers who have been assassinated by criminal liquor law violators, calls upon friends of law enforcement to support the President in carrying out declaration for prohibition nis declaration for prohibition en-forcement and commends Roy Haynes, National Prohibition Commissioner, and the Department of Justice for their work. It closes with an appeal for co-operation with the World League Against Alcoholism.

The statement drawn up by southern superintendents reads: Whereas the press of our country democrats of the north and east are ormulating plans to force the national convention next year nominate for President a mai to the Volstead Act and claiming that to the Voistead Act and claiming that the solid south will vote for any candi-date nominated regardless of his views on the prohibition question and that by nominating a wet candidate they can carry certain large states of the north and east and with the solid south will win the national election, we the under-signed superintendents of these solld Democratic states of the south wish herewith to state that the dry leaders of the south do resent such proposed action and we as superintendents of the Anti-Saloon League of these states will urge our followers to support the candidate for President in sympathy with the honest enforcement of the pro-hibition laws regardless of party.

It is signed by Atticus Webb, Texas; Charles O. Jones, Georgia; Thomas J. Bailey, Mississippi; David Hepburn, Virginia; J. Bibb Mills, Alabama; Parker Shields, Tennessee; E. M. Lightfoot, South Carolina; R. L. Davis, North Carolina; N. P. Laughbaum, Oklahoma; Ira L. Myers, Kentucky, and Paul E. Kemper, Arkansas.

SEIZURES NOT USED AS TREATY "BAIT," **AMERICA ANSWERS**

(Continued from Page 1)

for a new statement of the position in which this Government finds itself, its attitude toward law enforcement and toward other nations. Nothing has been changed by the remarks of Lord Curzon, or the seizure of sealed liquor, it is pointed out here, except that it seems obvious that the matter will have to be dealt with by Congress instead of, as the American Secretary of State had proposed, by agreement The treaty method would have been short, direct and effective, he believed. Appeals to Congress to take action to relieve the situation will involve delays and many complications. The point has been emphasized that the only purpose of the State Department in making its proposal was to relieve an irritating situation as early as pos-

Called "Misapprehensions" Lord Curzon's speech, and Lord Birkenhead's as well, contain so many evidences of misapprehension of the American position, officials here say

American position, officials here say they believe, that it is important that the conditions confronting this Government be made plain.

What the British seem in danger of overlooking, according to the official view here, is that this whole matter is primarily one of law. Following upon the enactment of the Volstead Act, steamship companies sought to find a loophole and British, French and Italian companies brought test cases. Meanwhile the Attorney-General gave his opinion to the Treasury officials that ships with liquor aboard

could not come into American ports. The steamship companies tried to prevent the carrying out of the law and the entire matter came up to the Supreme Court, which readered a sweeping decision, leaving no discretion to executive officials but to carry out the law as interpreted.

One of Two Things Necessary

One of Two Things Necessary

At once there began to be irritation and anneyance, foreign companies giving evidence of intention to act regardless of the American law. The Secretary of State studied the situation and came to the conclusion that one of two things would have to be done. Congress would have to act to clear up the situation, or the State Department would have to make a treaty which would relieve it earlier. It was again stated today that the intention of this Government in putting forth such a plan was not to aggravate conditions, but, on the contrary, to find a way which would help both nations in enforcing their laws and conforming to their practices. The and conforming to their practices. The United States, it is again affirmed, has not desire to interfere with the British or any other nation on the high seas.

POLICE BUILDING CORNER STONE LAID

Mayor Curley and Police Commissioner Wilson Speak

The corner stone for Boston's new police building, to house Division 2, the traffic squad and the property clerk, at Milk and Sears streets, was laid by James M. Curley, Mayor, shortly before noon today, Fred J. Kneeland, superintendent of public buildings of the City of Boston, presided at the ceremonies, which were opened by the playing of "America"

y the police band.
Following the invocation by the Rev. Donald B. Aldrich of St. Paul's Cathedral, Mayor Curley made an adthat the building had actually been started after years of delay. He said that it meant the expenditure of about two-thirds of a million dollars and was the largest of its kind in the world, that it would house the motor squad, which was an unknown branch of the Police Department 25 years ago, and that it would also contain a rifle range—the only one in New England inside of a police building. He also said that it was planned to build a new police headquarters this year at a cost of about

Mayor Curley said that the general contractor for this building, M. Seretto, had been in the United States less than 20 years, and that this showed the opportunities for all peoples in America.

The cornerstone contained copies of the current issue of Boston papers, declares must be withdrawn before records of the Police Department for progress can be made. the past three years, a program of the cornerstone ceremonies, copy of the city charter, the City Record, the City Register, a police badge, photo-graphs of Mayor Curley and Herbert

Mr. Wilson spoke briefly of the importance of this event in the history of the city and its police department, following which the builder and the architect, James Purdon, were introduced. The playing of the "Star Spangled Banner" by the police band closed the ceremonies.

The building will be of steel con-struction, with brick and granite walls, concrete floors and roof and terra cotta partitions. The gun range will will occupy the first floor. Bedrooms bility of a subsequent accord if neither side ties its hands.

Some of the French criticisms would floors will be bedrooms for 200 traffic suggest that the British Government

In 12 cases registration plates were taken away from operators of motorcycles and so far as this form of transportation is concerned, Mr. Goo win remarks that the cycles "have become a positive menace on the highways."

there is not much fear that many will be refused admittance, because their nation's quota is filled, except those coming from countries that have been assigned a small quota, such as Greece, Africa, Australia, Spain and Belgium.

The monthly quota for Greece is 613 and it is already known that two vessels from that country are bringing 1600 passengers. It is not certain, however, that all these were born in Greece. Officials with discretionary powers are expected from Washington to speed the work of disposing of questionable cases, Additional inspectors have been promised from other ports to relieve the rush, according to Mr. Curran.

LETTER FROM POPE DISPLEASES FRENCH

Contents Seen as Criticism of Republic's Methods-Diplomatic Conversations Continue

> By SISLEY HUDDLESTON By Special Cable

PARIS, June 29-With George Theunis, after long negotiations accepting again the premiership of Belfum, there will be a renewal of the inter-allied conversations on the reply to be sent to Germany's last offer and on the general allied policy. Mar quess Crewe, British Ambassador has paid another visit to the Quai d'Orsay, and it is understood that matters will now be hastened. In London the French Ambassador, the Count de Saint Aulaire, will furnish Marquess Curzon, the Foreign Minister, with much fuller information than he has hitherto been prepared to give. On the eye of the resignation of the Belgian Government, England ad-dressed to France and to Belgium a number of questions on Germany's passive resistance and the Franco-Count de Saint Aulaire has done little more than place before Lord Curzon a number of administrative acts elaborated by Germany against the occu-pation of the Ruhr Valley, together with the various orders, which France

On other points, such as the measures that France demands for the substitution of the present resistance by effective co-operation, such as the pre-cise reparations claims of France and A. Wilson, Police Commissioner, and a Belgium and the conditions regulating A. Wilson, Police Commissioner, and a card of James M. Curley, Jr., son of the the eventual progressive evacuation of the Ruhr, the French Ambassador has

Belgian crisis, consultations between Brussels and Paris have been continued and that the Count de Auliare is now ready with instructions to furnish further explanations. It is clear that Raymond Poincaré, the French Pre mier, still prefers oral conversations to written notes, and that he will refrain from committing the Government in black and white. Undoubtedly there be in the basement. Quarters for Sta- is a profound divergence of views, and tion 2 police, including a cell room, it is felt that there is the more possi-

cation to the French Government. There is a French Ambassador at the Vatican, and this recent re-establish-ment of diplomatic relations underlines the papal expressions, which are not pleasing to France, especially when it is understood that Germany has been aware of the terms of the letter for some time.

There is general condemnation of the document as directed against French policy. M. Poincaré has definitely rejected the idea of arbitration in the fixing of the German debt. He has also declined the evacuation of the Ruhr district before complete payment is made. It is felt that the let-ter makes it difficult for those French-men who have been ardent supporters of the renewal of diplomatic relations with the Vatican, and who would have had more lenient measures adopted toward the Roman Catholic religious bodies in France. It seems unlikely that the papel letter will change the French program in any respect.

tions, to every effort of the people to help themselves in dealing with the high cost of living and the relationship of incomes to our household budgets.

I have wondered if it were not possible, for example, that a scheme of co-operation among consumers, financed in part at least through a carefully organized and supervised adaptation of the principles of the savings bank or the building and loan society, might be made to serve a splendidly useful purpose in this department of our economic life. I think this would be preferable to having limited sections of the community undertaking to establish financial independence and economic solidarity, as some of them have lately been doing.

darity, as some of them have lately been doing.

The development of such a general program into a sound working business scheme would doubtless be found chiefly an affair of the state government, but one in which the jointure of state and national authorities might prove practicable and even necessary.

I bring this suggestion of a direction which might be given to activities of the kind. I believe the suggestion is worthy of careful examination and consideration. I am convinced that its discussion would be fruitful of good results, and a reminder to some who are sults, and a reminder to some who are disposed to take tolls from both the consuming and the producing public, that this public has the right, the power and the ability to devise means to pro-

Subject Exhaustively Discussed at Hearing on Eastern Railway Wage Demand

Operation of one-man trolley cars ame in for an exhaustive analysis, oth from the point of view of the reet raffway and the men who run the cars, at the hearing today b the arbitration board sitting in the wage controversy between the employees and the public trustees of the Eastern Massachusetts Street Railway Company
Multi-dexterity is required of the

operator of the one-man car, accing to George E. Keegan of Lawre president of the joint conference by president of the joint conference board of the employees. He pointed out that the operator has to do the work of two men, has to answer twice as many questions, has to bear twice the responsibility if snything happens to the car, has to take care of portable equipment formerly cared for by two

Mr. Keegan said that the mo conductor has to call out streets, con-tend with the complications of a much greater automobile traffic, handle six or eight different kinds of tickets, collect extra fares in interurban service, replace trolleys and even plow snow while operating in the winter.

Robert J. Egan of Quincy, a mem-ber of the joint conference board, testified that if he had the choice between taking out a one-man car at the 5-cent-an-hour increased wage and a two-man car, he would take the lat-ter. He testified to the same difficul-

ter. He testified to the same difficulties of operation as Mr. Keegan.
Arthur G. Wadleigh, a member of
the Board of Public Trustees, who
is conducting their case, pointed out
that the street railway is no longer
a potential monopoly. It is faced ali
the time with a potential opposition
that may cause it to operate at a loss.
The form of this opposition, he said,
is all one-man operation, namely, the
jitney bus and the individually operated motor vehicle. This is the character of the competition that must be
met. Mr. Wadleigh declared, if fares
have to go up in order to pay higher
wages.

wages.

It is possible, the trustee asserted. It is possible, the trustee asserted, that street railway operation may get to a point where public opinion with respect to fares may force public authorities to consider sanctioning some alternative method of transportation. He pointed out that until August of last year no dividends had been paid to stockholders of the Eastern Massachusetts since the public trusteeship began five years ago.

Questioned by James H. Vahey counsel for the men, Mr. Egan testified that he went to work for the company ing a 10-hour day. He told the board that his son, 18 years of age, went to work at the Fore River shipyards for \$25 a week without any previous experience. Charles A. Taylor, secretary-treasurer of the joint conference

This conference at this time is the fulfilment of a plan formed as the World War was drawing to a close. It seemed to the members of the National Education Association that the governmental authorities that were charged with the great task of setting the disturbed world on its course were too occupied or too hurried to provide a place for the consideration of Educa-

a place for the consideration of Education as a practical instrumentality for the creating of a new world order.

Or was it that statesmen and diplomatists, generals, and economists naturally regarded education as dealing primarily with children and of a non realizable value? Whatever the reason, education was left to put in its own claim. The National Education Association took steps to call such a conference as this.

ference as this.

But a careful inquiry convinced the But a careful inquiry convinced the officers that many of the older states and most of the new ones could not arrange to send delegates who could bring to or take from such a conference the advantage that should be gained at such a world gathering. The meeting is the final realization of the plan formed five years ago. The conference could not be held earlier, it is early enough for a beginning. I believe that the outcome will prove that lieve that the outcome will prove that it was not called too soon.

Education Must Be Tried There is an urgent, need that a world conference on education should be held. The world is one. Science, invention, industry, commerce, communication, transportation contemplate and act on

conference.

We would not belittle or ignore the unifying and fundamental function of government, nor of diplomacy in its place, nor of a system of national defense in the world of foresent reality. But while we utilize other traditional forms of social control, we want to try what can be done through education. As a means of developing and insuring peaceful international co-operation no peaceful international co-operation no one can claim that it has ever been tried. We are going to begin here and

The foundation of this world conference is laid in some fundamental as-sumptions that should be made explicit. These assumptions underlie all modern endeavor in the field of education. May I venture to formulate some of them:

Joyous Struggle Forecast

The aim of education is the control of individual life, of national life, of international life. The control that it seeks is one of knowledge, wisdom, skill, resulting in happiness. Mastery of the forces of human nature and the world is the instrument of this desired control. But education as a form of social control will not come of itself. Men and women must organize, and labor to effect an education that will realize the individual and social values

with this diagnosis the feeble efforts made to apply the one approved remedy. In spite of what we write and say, the world does not believe that education. The disproves the charges of religious of the Christian Science Monitor the persecution. as a form of social control is comparable

It is idle for professional view. We to lament this traditional view. We should spend our time and efforts in fluence, hopes that Dr. Education Is International

Education is international. The sciences underlying education are universal in their validity. Geographic, mathetic trial.

address, followed by prominent educators, including Dr. David Starr Jordan, Miss Williams, Dr. W. P. Kuo, Constantine A. Panagopoulos, Consulgeneral of Greece, and Dr. John Adams, professor of education, University of London, London, England.

Education as Peace Factor
In his address to the conference Dr. Owen said in part:

This conference at this time is the fulfillment of a plan formed as the World War was drawing to a close.

World War was drawing to a close.

Is more than a mere extended analogy.

A fair and dispassionate realism in education will start with the nations and peoples of the world as the value of what it will recognize the value of what it will recognize the value of what it will betterment, not in the dissolving of national life into a hypothetical and doctrinaire internationalism, but it is an international co-operation that will preserve and cherish the personality of each nation while it contends against blindness, ignorance, retarding hate, and mutual suspicion.

N. E. A. Desires to Co-operate

The National Education Association of the United States is composed of teachers passionately devoted to their country and deliberately patriotic in the service they render. But they want to co-operate with all teachers from all lands in the effort to make war and international injustice perish from the party and make understandfrom the earth and make understand-ing, appreciation, mutual self-respect, and fair play control men's conduct at home and abroad.

home and abroad.

This conference, tadies and gentlemen, will be what we make it. If we undertake or expect too much, we shall accomplish little. There are things that education can do, if educators but resolve to see that they are done. This first world's educational conference should be the beginning of a series reaching out into the future. It should not adjourn without planning for the next one. At any time and at any place the teachers of America will meet you through their representatives with you through their representatives with modest but determined resolution to see what education can do to make of us brethren in mind and heart and act. May this spirit rule and mold your deliberations.

Dr. Jordan in his address on Pacific coast friendliness, quoted a Japanese delegate: "The ocean no longer separates us, but joins us together industry, commerce, communication, transportation contemplate and act on this view. Government, imperialism, diplomacy, militarism have all tried to unify and hold in subject the life of the world. Human nature is more powerful than any external form of institutional control that society has produced. The one outstanding possibility that has never been given a trial is education. Why not try it?

This is the reason for calling this conference.

policy of isolation would forfeit this high commission. He urged, as the next step, an international educational association not only to continue the work of this conference but to provide a permanent organization under the leadership of America for further development of the conference.

Dr. John Adams, representing the teachers' registration council and the need for prohibition in order to insure ing them. ollege of preceptors, said these institutions stand for private teaching respect for the Eighteenth Amendolutionary changes possible if the which will not allow this section of courts in an effort to bring to greater the feet of bootleggers and moonshinthat State.

TIKHON CONFESSION

people can be reached and the teaching of temperance becomes a method of shaping public opinion and creating a sentiment favorable to law enforcement. The children of the foreign-born need especially to be instructed in the basic need for prohibition. In many instances their parents come from lands in which it is customary to use liquor as it is here to eat bread, and these children cannot understand why prohibition has cannot understand why prohibition has become the law of the land. They must be schooled in the fact that alcohol is no less a narcotic drug than opium and

morphine...

When people understand these truths about alcohol we will not have the fuzzy thinking which obtains too frequently at present and leads to the demand for at present and leads to the demand for beer and wine. Children must be taught that the same alcohol which makes whisky a poison is present in beer and wine and that the average drinker imbibes the same amount of alcohol whichever beverage he takes. They must learn that intoxication does not always mean drunkenness, in the commonly accepted meaning of the word, but that, as I was recently told by a Canadian magistrate, a man who has had but a few drinks and is still able to walk successfully down the street may be totally

cessfully down the street may be totally intoxicated for automobile purposes.

Much credit must go to the teachers looking to them to carry on and to complete the building of a sentiment in the coming generation which will abol-ish completely the liquor traffic and its attendant evils.

Miss Stoddard has brought with her

perance education, designed to illustrate to educators and textbook publishers the necessity of stressing this branch of education. The exhibition is among many others connected with the

TOWARD AMERICA

Lord Astor Charges Drink Trade With Waging Anti-American Propaganda

By Cable from Monitor Bureau LONDON, June 29-Viscount Astor's emarks about anti-American propaganda in Great Britain, which dispatches from America indicate is as those of the land itself. President being featured and perhaps misunderstood, was not, The Christian Science Monitor representative is reliably informed, intended in any way as meaning that unfriendliness toward America was widespread among British ministry of public instruction. At the people. The statement in question was present time Dr. Jose Vahconcelos, an every state of the Union, Miss Stoddard said:

The children who 10 years from now will be the controlling body of citizens in the United States need to know the basic reasons for abolishing the liquor traffic in the country. Every forward move in legislation, especially legislation relating to temperance, has been preceded by an educational movement, and every time the educational program has been slackened there has been a backward movement. The present time is one in which the reasons for prohibition should receive additional stress in the public schools of the Nation.

Through school children many older people can be reached and the teaching of temperance becomes a method of temperance becomes a method of the nation of the statement in question was made in a speech before the Charitable Organization Society and reported in the London press of Tuesday. What he basic reasons for proward was, that since America had tried the "great experiment" of prohibition a the licensed trade in Great Britain "had been carrying on an anti-American propaganda. He objected to this, as to his mind the hope of the world lay in the better understanding between the two nations.

The collection was promoted in the Charitable Organization Society and reported in the London press of Tuesday. What he basic reasons for prohibition at the understanding and was, that since America had tried the "great experiment" of prohibition at the isometric was a solution at the London press of Tuesday. What he basic reasons for prohibition at the London press of Tuesday. What he basic reasons for prohibition at the London press of Tuesday. What he basic reasons for prohibition states in the United States in the United States in the London press of Tuesday. What he basic reasons for prohibition at the London press of Tuesday. What he basic reasons for prohibition at the London press of Tuesday. What he basic reasons for prohibition at the London press of Tuesday. What he can be said was, that since America had tried the "great experiment" of prohibit made in a speech before the Charitable | outstanding Mexican scholar, is Millis

He also said, "I have learned much about politics. The drink trade is out to turn my wife out of public life. In order to protect her I have been obliged to follow the machinations of order to obliged to follow the machinations of the trade. I do not want any trade to have such a hold on politics as is held by the drink trade." As for the moderate drinking argument, he would ask those who advocated the adoption of continental ideas on the drink question, whether the morals of wine drinking countries were heter and the little and the little such trades. ing countries were better, and the lit-erature cleaner than the morals and

literature of Great Britain.

Thus Lord Astor's comments were confined to the drink traffic in Great Britain and the anti-Americanism emanating from it. It is a fact, however, that there are other sources in-spiring such a sentiment. There is the extreme pro-French party, which is set on having a hard and fast Anglo-French alliance, which they consider impossible if an Anglo-American accord becomes really operative. Then there are the "red" radicals to whom private enterprise is anathema, and who therefore disapprove of America as being "reactionary."

Despite certain anti-American ele-

ments and the artificial stimulation resorted to, the anti-Americanism in Great Britain is still politically not formidable. The peoples want to be friendly and the governments have been conspicuously and consistently

George C. Danforth, chief engineer of the commission, regrets that legislative action has created a definite political issue. He says the inevitable result is a definite discouragement of water-power development in Maine, and, incidentally, the State has lost an income of approximately \$20,000 a year inciting to rlot.

The forces of policemen on guard at the different Boston local telephone exchanges were doubled in size today, owing to the disturbance in Milk Street yesterday. The girl pickets, however, had been warned as to the full extent of their rights as pickets and as a general thing were careful not to run athwart police regulations.

The telephone company again sent from taxation alone. This is based on the state tax only, and does not take into consideration the loss in taxation to any towns or cities. There has also been lost the protection against such floods as that of May 1, as well as the loss this year of industries and em-ployees, due to low water. The telephone company again sent out statements declaring that it had the strike in hand and that exchanges

foods as that of May floss this year of industries and ployees, due to low water.

"It seems reasonable to emphasize the belief that we must settle our water power question quickly," the report concludes, "or we will find that states with industries having a reason for coming to Maine on account of our tampering with the jury room and of tampering with the jury other reports, even more significant, have come to the ears of the district attorney. He has been informed, for example, that a been informed, for example, that a which had been short-manded were being slowly recruited to full strength.

The bulletin of the company said that no more operators had left the service. Main, Beach and Richmond exchanges are not giving full service, despite the fact that many new operators are at work, and the public is asked to be patient and appreciative of the facts. Back Bay, Congress and Haymarket are being operated without difficulty. Boston toll is said to be normal. In Newton Center, Newton North, Waltham and Needham the service is admittedly water power problem, it will be set-tled for us. When that time comes, will there be industries in Maine to not normal, but new operators are being hired. Revere is said to be nearly use that power? The result depends very much on ourselves." normal and Medford 80 per cent nor-mal. Hyde Park is said to be 75 per

Brockton is 70 per cent effective, it is reported, while Salem and Lynn are unchanged. Worcester reported that little change has been made. The service is still slow. Providence and Pawtucket have shown some improvement but the service is not normal. In Springfield the company says that normal service will be had in 10 days that the plant would be closed down the service is not normal. In Springfield the company says that normal service will be had in 10 days or two weeks it is said 135 vear.

A Mouse in the Screened Porch

N THE floor of the screened porch a very small mouse sat perfectly still, and in the doorway Jimmy and Jennie and their mother stood and looked at it, and wondered what to do next. The porch had only one door, which opened from the stood and looked at it, and wondered what to do next. The porch had only one door, which opened from the house, so the little mouse must have

come out that way.
"Isn't it cunning!" said Jennie.
"I wish we could keep it and tame

it," said Jimmy.

"And play with it," said Jennie.

"And have a little house for it to

live in," said Jimmy.
"And feed it," said Jennie. "And teach it to sit up and beg like Fido," said Jimmy.

But their mother wasn't anything like so enthusiastic about having a tame mouse. "I wish there was a door we could open and let it run away," was all she said.

away," was all she said.

The little mouse ran here and there, and then settled down again. It was really a very soung mouse, and didn't seem to know that it was being looked at and talked about.

"I'm going to get Uncle Peter," said Jimmy. "He'll know what to do with that mouse."

Uncle Peter was making a visit, and when Jimmy had brought him from the library, he looked thoughtfully at the mouse, then he went quietly away

and came back with a glass tumbler and a sheet of blotting paper. "I don't know whether this will work," said Uncle Peter, "but it won't hurt to try it."

Then Uncle Peter took a step,
And softly took another.
The watching children held their breath,
As did their watching mother.

The little mouse sat very still.
Its thoughts seemed full of cheer.
And Uncie Peter stept and stept
Till he was very near.

"Uncle Peter's going to try to catch it in the tumbler," whispered Jenny. "I wonder what he's going to do with the blotting paper," whispered

Jimmy.
Uncle Peter bent over, very, very, very, very, slowly, and the mouse never moved. And Uncle Peter put the tumbler very, very, very, very slowly over the mouse, and then the

CONTROL OF THE RIVER MURRAY OF IMMENSE VALUE TO AUSTRALIA

System of Locking Projected, Raising Water 6 to 20 Feet and Rendering River Navigable for 1500 Miles

(Special Correspondence)—A prominent Australian Cabinet Minister who has carefully examined the problem says: "It is quite possible that to at various conclusions after an exten-lock the River Murray may involve sive tour covering 1,000,000 acres, in-Australia in an expenditure of £9. volving 600 miles of motor traveling.

They gave careful attention to sev-Australia in an expenditure of the common-of the entire population of the Common-wealth." This vast development the great contrast in agricultural development contrast in agricultural developmen scheme must forge ahead, as to a on the two sides of the River Murray, and one of the main reasons for this great extent the future of the country pends upon its success. The origstriking difference appeared to them to be the absence of transit facilities inal estimate made some years ago was £4,600,000, of which the Commonwealth was to contribute £1,000,000. It has been found that in practically every great Australian enterprise, the estimates have invariably required recasting before completion of the work, and sometimes the original sum has to be doubled. be respected by the governments and people alike, struck a serious note of

The Federal Government who have considerable say in the scheme have considerable say in the scheme are certainly sympathetic toward its completion, but many things have to be considered.

Commission of Four Members

The Rivary Commission was closely associated with the establishment and expansion of oversea markets for their products, and this vital point demanded careful attention. Sir Joseph Carruthers, a former

The River Murray Commission was State Premier, whose well-known constituted in 1917, and consisted of slogan, "A million farms for a million four members representing the Federal Government, and the governments of New South Wales, Victoria and South Australia. They lost no time in getting into stride, and authorized investigations, surveys, works, gaugings, diversions and a multitude of detail. An agreement was entered into under which the construction of the Lake Victoria storage within four years was diversions and a multitude of detail. An agreement was entered into under which the construction of the Lake Victoria storage within four years was provided for, the Hume reservoir within seven years, and the bulk of work within 12 years of the date of the agreement. Under the scheme 35 weirs and locks were to be constructed, which would render this famous river, sometimes called the Nile of Australia, navigable permanently for 1500 miles. The locking system would raise the water from 6 feet to 20 feet along the entire course of the Australia's schemes this one is re-garded as one of first importance 20 feet along the entire course of the system in the Murray for 900 miles, and in the Murrambidgee for 240 miles. This would have the result in ing for irrigation purposes. From a particular area of 200,000 acres of irrigated land, 13,000 people were being supported in prosperity. Under irrigation 15 acres were sufficient for the needs of a family, and in many in-stances it was recorded that families

were prospering on a 10-acre block.

Arts Commission—Unit to Smithsonian Institution Urged

BERKELEY, Cal., June 14 (Special
Correspondence)—A campaign for the
establishment of a national art gallery and for a federal fine arts commission will be launched in December by the General Federation of
Women's Clubs, under chairmanahip
of Mrs. Rose V. S. Berry of Berkeley.

Mrs. Berry is national chairman of
fine arts in the federation and her
department in its year's work stands
pledged to such a campaign and to a
renewed war on billboards.

"Congressmen and senators will be
informed that, there is no place in
America where an American collection of art can be shown adequately,
and that the Smithsonian Institution
is losing annually valuable works ot
art because it has no room in which
to place them. A unit to the institution will be asked, said Mrs. Berry, in
discussing her plans with a representative of The Christian Science Monitor. She added:

We also hope to have created a Fed-

Music Program Planned

Mrs. W. E. Little of Massachusetts, national art chairman, is urging that each state art chairman engage an art exhibit for a certain month or months during the coming year, then offer it to the various clubs in her state and make for it as large a circuit as possible. We also hope to have created a Federal Fine Arta Commission for whose work there will be a Government appropriation. This commission will be asked to serve without pay, and it is possible it will be composed of Cass Gilbert, John Russell Polk and two painters, one of whom will be a landscape painter. circuit as possible.

A reform in music in Sunday Schools is also a work to be undertaken this year by the Fine Arts department under chairmanship of Mrs. Marx Obserndorfer of Chicago,

Billboard Ban Sought Upon authority of 2,000,000 voting club women who twice have adopted resolutions condemning advertising signs which disfigure buildings and interfere with the rights of the taxpayers to full enjoyment of outdoor beauty by concealing attractive areas along our public highways. we will seek legislation that will forbid, or at least limit, further encroachment on nature's loveliness.

CALIFORNIA-ARIZONA BOUNDARY DISPUTED

PHOENIX, Ariz., June 23 (Special Correspondence) The states of California and Arizona are to appoint official commissions for determination of the boundary line that separates them. It is assumed to be the center of the main channel of the Colorado River.

The necessity for determination arose when the people of the Palo Verde Valley, on the California side, sought to throw the river's flow into an old channel through a point of land on the Arizona side. At first op-posed by the Arizona authorities, this work finally was permitted and the summer floods, now at peak, have taken the new course and have threatened the California levees.

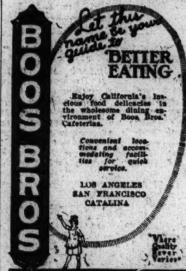

ARIZONA TO CHECK BORDER SMUGGLING

PHOENIX, Ariz., June 23 (Special Correspondence)—President Harding has written Gov. G. W. P. Hunt of Arizona approving the latter's suggestion that a neutral zone be established along the international line, as an aid to battling the traffic in narcotics now known along the border.

The President expresses belief that the plan is "full worthy of consideration," and states that he has referred it to the Secretary of State, to call the matter to the attention of commissioners of both nations.

THEIR FALL TO WETS

TORONTO. Ont., June 27 (Special
Correspondence)—E. C. Drury, the defeated Premier, yesterday requested
the Lieutenant-Governor of Ontario to relieve him of office on July 16, and
G. Howard Ferguson, the premierelect was summoned to Government
House and formally accepted the responsibilities of office.

In an interview Mr. Drury attributed his defeat to the wet vote. The wets in Ontario, he believed, constituted a sufficiently strong element to elect any one party with which they aligned themselves. His own hope had been that they would divide on party lines between the Liberals and Conservatives, and that the Farmers' Party would thus be able to just overtop both of the old parties. They had, however, voted solidly with the Conservatives.

LOS ANGELES PLANS
\$5,000,000 CITY HALL

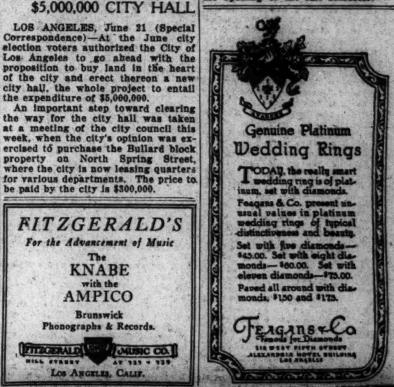

of a total of 10,424 cast. This is the largest voic ever recorded here for a public betterment issue.

The Board of City Directors already have taken the initial steps to put the new program into effect. The plan provides for a civic center on Garfield Avenue, north of the Federal Building. With a municipal hall danked by a civic auditorium and a new public library building. Specific amounts were provided in the bond ordinance for these improvements, which will cost about \$2,000,000.

The remainder of the money will be expended for lands on which the buildings are to be erected and for property needed for street openings.

Condemnation proceedings have allends for the city plans.

More than \$1,000,000 worth of public school buildings are in course of construction in this city, to be ready for the opening of the fall semester.

LOS ANGELES, June 21 (Special Correspondence)—At the June city election voters authorized the City of Los Angeles to go ahead with the proposition to buy land in the heart of the city and erect thereon a new city hall, the whole project to entail the expenditure of \$5,000,000. An important step toward clearing the way for the city hall was taken at a meeting of the city council this week, when the city's opinion was exercised to purchase the Bullard block property on North Spring Street. BOLTS OF ARTIFICIAL LIGHTNING REVEALING SECRETS OF NATURE

American Institute of Electrical Engineers Told of Possibilities in Recent Experiments

SWAMPSCOTT, Mass., June 25 (Special)—Flashes of "artificial" lightning, lasting a millionth of a second and carrying maximum voltages of 2,000,000 "tame" volts—equaling for a millionth of a second the power of all the controlled electrical energy at Pittsfield Laboratory, General Electric Company, were described this morning at the American Institute of Electrical Engineers' convention by the man who produced them, F. W. Peek, Jr.

Peek Jr.

Before telling the results which have already been secured in experimenting with the greatest amount of energy ever concentrated by human ingenuity, Mr. Peek said the voltage in future will be even greater, and the 480 tinfoll-coated glass plates which in the condenser of the lightning generator at the "High-Voltage Engineering Laboratory" have made the collection of such voltages possible, will be increased in the future to 1000.

Improvement in Lamps

The improvement that has been made in incandescent electric lamps since they first became commercially available in 1880 was described by John W. Howell, of the Edison Lamp works, Harrison, N. J. In the 43 years since the first faint lamp was made with a carbonised paper filament, through successive filament stages, of carbonized bamboo, asphalted bamboo, treated cellulose in 1894, metallized

Extraordinary Facts Revealed Already extraordinary facts are being revealed by the Pittsfield current, at present twice that ever previously produced and safely handled. So rapid is the discharge of the voltages that even in a "microsecond," or millionth part of a second, the discharge of volts may be in the millions. The speaker concerned himself largely with the erratic behavior of such lightning flashes photographing themselves on a plate, when they encountered the de-lay or "lag" in the breakdown of in-sulation under this strain. Much

tographing itself in its fractional-sec- compared to the former 50 lumentographing itself in its fractional-second passage, shows the characteristic zig-zag and side flashes of sky discharges. It also gives out a loud explosive report. Using a 1,200,000 voltage lightning stroke, it was found that the lightning in rain did not follow the drip on a shielded string, which ordinarily might have provided a good conductor, but instead cleared it in a leap. Conducting metal was punctured by the lightning. The speaker told of suspension insulator units of cement type, punctured through the head by a direct bolt, in which not only the porcelain was shattered, but

These tests, Mr. Peek said, showed incidentally how useless a high resistance lightning arrester is; and that a thoke coll will cause dangerous voltages. Studying the ability of an ordinary "conductor" to resist rupture from high voltages, it was found that es that melt or boil away, if subjected to continuous small portions of the Pittsfield current, could carry very high stress without appreciable eating, if the current were applied

suddenly.

After disrupting various conductors

Since the time of application was about one micro second, there was no heating. Applied in the usual way over a few seconds, not 1 per cent of these voltages would be possible with-out causing the water to boil out."

The test showed that the disruptive

strength of water is much greater than that of air and that conductors at operating voltages may be very good conductors at lightning voltages. In conclusion, Mr. Peek said that lightning voltages are now available Harvard, and to the Lyno General in the laboratory, probably exceeding Electric Company. Professor Karapeeven those usually flashed from the sky, and induced on transmission lines. Insulator strings had been at 5:30. The convention will conclude cleared in the laboratory rarely

carbonized paper filament, through successive filament stages, of carbon-ized bamboo, asphalted bamboo, treated cellulose in 1894, metallized carbon 1905, tantulum and tungsten filaments in 1906-7, drawn tungsten wire 1911, to the gas-filled tungsten filament lamp of 1913, the speaker found a progressive improvement in

lamps.

If the present 40-watt vacuum lamp were made for the same mean efficiency as Thomas Edison's first bamboo carbon lamp of 1880, the former would have a life of 150,000 years. Like comparing glow-worms to candles, the speaker went on to contrast the early commercial lights, which in their turn had displaced gas and excited the startled amazement of their period, to higher lightning voltages, he had found, are needed to jump a given distance, than voltages at normal operating frequency. Conductors may turn to insulators under the Pittsfield quality as the former, it would last turn to insulators under the Pittsfield discharge, and even water may be "punctured" by the spark.

The "manufactured lightning," photographing itself in its fractional-sec.

need by a direct bolt, in which not only the porcelain was shattered, but the metal cap "had the appearance of having been punctured by a bullet shot through from the inside."

Uselessness of Arrester

These tests, Mr. Peek said, showed incidentally how useless a high resistance lightning arrester is; and that

The difficulty of sealing heated cop-per to glass, an essential part of electric-lamp making, where the glass becomes more and more fluid until it has the consistency of rather wet molasses." and "wets copper, just as at room temperature, water will wet glass," was described by W. LAXITY CHARGED BY DRY LEADERS

Springfield Alliance Dissatisfied With Police Methods

SPRINGFIELD, Mass., June 29 (Special)—Lax enforcement of the dry law is charged by the Citizens' Alliance enforcement committee which has forwarded a written com plaint to the Police Commission with regard to the use of 32 new members recently added to the police force. It is alleged that these men are being employed to gather evidence against comparatively obscure violators, while proprietors of thriving saloons in operation since pre-prohibition days are entirely overlooked.

have positive evidence," Roger Johnson, chairman of the com-mittee, "that in a dozen old-time saloons in the down-town section intoxicating liquor is being sold openly.
Superintendent Forgrave of the AntiSaloon League, and leaders of the
Citizens' Alliance, declare that, notwithstanding 66 liquor cases prosecuted at the recent sitting of the
United States District Court here and United States District Court here and 15 heard at the last session of the Superior Court, they are not satisfied with the work and omissions will be emphasized insistently until a better order prevails.

An investigation is being made here failure to publish the names of hysicians and druggists who are violating their liquor permit privileges.

AMERICAN GARDEN CLUB ENDS MEETING

NEWPORT, R. I., June 29 (Special) NEWPORT, R. 1., June 28 (Special)

—A Rhode Island clambake, served last evening at the Newport Clambake Club at Easton's Point, ended the festivities of the Garden Club of America which has been holding its annual convention here during the last three vention here during the last three days. The delegates are leaving in

After disrupting various conductors by the current, water itself was actually "punctured," without boiling or heating. Mr. Peek said:

"The appearance of the spark was very much like a disruptive discharge in air or oil, and was quite violent. It was possible to cause voltages as high as 165 ky across 6.6 inches of water.

keeper, of the research laboratories, American Telephone & Telegraph Company, and Western Electric Co field laboratory, teld of two photographic methods developed to study the fractional-second discharge of lightning voltages. Among other speakers, H. B. Brooks, Bureau of Standards, Washington, D. C., presented tentative specifications prepared by a subcommittee of the Institute for standardization of American electrical measuring instruments.

This afternoon inspection trips will the industrial lighting exhibit

PLAYGROUNDS READY TO RECEIVE 1,000,000

Special from Monitor Bureau NEW YORK, June 29—More than 1,000,000 children, youths and eduits will gather at public playgrounds daily with the closing of schools throughout the United States this week, according to the Playground and Recreation Association of America.

In 1922, the average daily summer attendance at play centers in 429 cities was more than 1,414,000. This year the number will reach 1,250,000, it is estimated. The playgrounds are conducted by municipal recreation commissions, park departments, public schools or by other agencies.

Many cities are now throwing open the series of the small boy in charge of it. All eyes watch the leader, five-year-old Frances Kosieska, who, from the vast elevation of a kindergarten chair, solemnly directs the music, And when the last bar is played a chorus of eager voices calls, "I atopped with the piano!"

"All instruments down," says the teacher, and reluctantly they are released. Here and there unwilling fingers refuse to loose their hold on a cherished tem-tom or tambourine, until a meaning but gentle "Don't you want to play again?" gets instant results. NEW YORK, June 29-More than

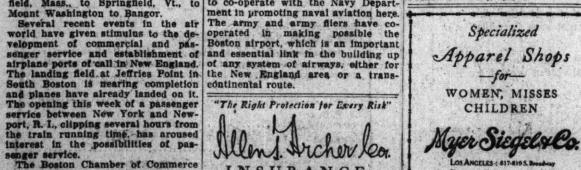

Best New England Air Routes Capt. E. B. Lyon and Porter H. Adams Will Report on

ducted by municipal recreation com-missions, park departments, public schools or by other agencies.

Many cities are now throwing open swimming pools to their citizens. Last year 180 cities reported 465 pools. One Envisaging a network of airways between landing fields at advantageous places in New England, Capt. E. B. Lyon, air officer of the First Army Corps Area, and Porter H. Adams, vice-president of the National Aeronautic Association, will leave tomorrow on a trip through the northeastern group of states to ascertain the best possible sites for airports, New Hampshire and Vermont will be given particular attention. Tentahundred and one communities re-ported 398 public baths and 127 announced that they had 223 bathing beaches. Streets were closed for children's play in 53 cities, 36 of them having these streets under supervision of play leaders.

homes and with little or no knowledge of English every child responded to the universal language of music. The age-old love of rhythm, coupled with the childish love for noise, found fascination in expression. Perhaps their ancestry explains their responsiveness. Miss Anna Johnson, the teacher, says, "I think foreign children have more natural ability to catch rhythm than our own American children."
At all events as you watch the small musicians you can trace that ances-try. There is a certain stolid seriousness in the way the child of Polish extraction beats the tom-tom; there is

gayety and abandon in the manner in which the little Hungarian rings her bells, and something almost tragic in the solemnity with which the small Russian boy beats the drum. Teaching of Rhythm

have contributed to the love of rhythm

The orchestra was formed with the The orchestra was formed with the idea to teach rhythm. It had a very modest beginning. At first an Indian club and a drum stick were the only "instruments." Then one day an interested small boy brought a horseshoe and a ten-penny nail and later a little girl offered a bread board and a drum stick. Bells of different kinds, clappers and small toy xylophones were added to the collection so that everyone might play, and finally came a real bass drum, a triangle, two

cession of players so that everyone may have a turn in that position of importance, and if Stasia has the triangle today, John must have it tomorrow. The tom-tom has an eager wait-ing list of small boys, while the little girls love the jingle of the tambour-

ines.

"The children are never too tired for a concert," Miss Johnson says.
"No matter how restless they may be, or how interested in other tasks or games, the announcement of a concert starts a shout of approval. Chairs are quickly arranged in a semicircle and they are in their places and clamoring for their instruments. I have found that the orchestra is as much a diver-sion as it is a means for teaching

TEMPLE DESIGNED

PROVIDENCE, R. I., June 29 (Spe cial)-Tentative plans for the erection of a Masonic Temple here at a cost to approximate \$1,500,000 have been made by a committee representing various

approximate \$1,500,000 have been made by a committee representing various. Masonic bodies of Greater Providence, and it is expected that the work preliminary to financing and contracting for the building will begin soon. Reports on the project, held in abeyance when the United States entered the war, will shortly be taken up with the Masonic units for approval.

The present plan provides for a marble building on Capitol Hill, opposite on Francis Street, from the celebrated marble State House. The temple would have frontages on Francis, Brownell and Park streets, on land which has been acquired and held in the interest of the united Masonic lodges for several years. The temple would stand on the Francis Street side of the tract with an auditorium on the Brownell and Park Street portion to seal 2500 persons. This would give Providence the large assembly hall, which is regarded now to be a public necessity.

A banquet room to accommodate 2000 persons, an asylum for commanderies with capacity of 1000, and lodge rooms for either 250 or 500 have been arranged for. A grand foyer with measurine floors for offices and a Masonic library have been arranged for by the architects. which gave such ready response to the teacher's efforts. 7ISCONSIN'S grand old man of banking, Andrew Jay Frame, chairman of the board of directors of the Waukesha National Bank of Waukesha, Wis., was honored by being given the greatest ovation accorded to any speaker at the annual convention of the American Bankers' Association in New York City last October. This came at the conclusion of his speech in the open forum conducted on the question of branch banking. Mr. Frame was selected to lead the opposition to branch banks because for 20 years he has fought vigorously all legislation favoring banking concentration. He won a notable victory for the element he represented, resolutions against branch banking "in any form" being opted by an overwhelming vote.

Mr. Frame is known as an authority on the history of banking. . He has devoted his life to a study of the currency problem and has written exhaustively on the subject. His high standing is attested by the recognition given his work by the Library of Congress. When in 1913 this institution issued a "Select List of References on the Monetary Question," covering pamphlets and other publications from authors of internationa

repute, 20 were credited to him. Frame always has been a militant champion of sound money and tested banking methods. He has addressed more than half of the state bankers' associations of the United States. Five times he has been a speaker at the conventions of the American Bankers' Association, and his voice has been heard at bankers' clubs, chambers of commerce, the New York City Forum, and at academies of political science. Mr. Frame was chairman of a committee which drafted and succeeded

in placing on the Wisconsin statute books a law that ended "wildcat" and other forms of unsound banking in his own State. In 19 years, through wise enforcement of this law, there occurred only three small bank failures in which depositors sustained a loss. For this invaluable contribution to the Commonwealth, Carroll College of Waukesha conferred upon him the honorary degree of LL. D.

Born in a log cabin in Waukesha, by hard work he rose to the head a bank with deposits of \$4,000,000, an institution that never suspended cash payments through the dark days of the panics of 1873, 1893 and 1907, and earned its slogan, "Stronger Than Ever."

NEW HAVEN'S MAY-**EARNINGS BETTER**

Net Railway Operating Income Gains \$269,000, the Best Since September—Charges Earned

The New Haven road's May earn-were better than those for the Mr. Leffingwell has been a member ings were better than those for the earlier months of the year, with a of the law firm of Crayath, Henderson, \$269,000 gain in net railway operating Leffingwell & De Geradorff since 1902, income to \$1,484,965, the largest bal-ance for any month since last Septem-third attorney to become a member ber. This means that the road in May

september, 1920, only one other month recorded more than \$12,000,000 of Yale University and from the Columbia revenues—October, 1920, with \$12,365,—law school and holds an honorary Masout. Leffingwell is a native of New York City. He was graduated from Yale University and from the Columbia law school and holds an honorary Master of Arts degree from Yale are running close to the record, despite the 10 per cent reduction in freight

Freight revenues last month gained \$1,263,132 to \$6,554,924. That followed a \$1,529,000 increase in April and a \$442,000 gain in March. For the five months freight gross ran \$4,154,497 greater than the corresponding period

The ratio of expenses to gross is the lowest in many months. In May it required 77.5 per cent of revenues to cover expenses, a reduction of 2.7 per cent during the year, and comparing with a .77.8 per cent ratio in April, 80.3 per cent in March, 88.5 per cent in February, and 94.1 per cent in

The May debit balance for equipment rents was the lowest for any month this year at \$456,105. The April debit balance was \$641,718, compared with \$731,000 in March. For the five months the debit balance was \$3.013.895, as compared with only \$394,303 during the corresponding period of 1922. This large debit balance has been an important factor affecting net profits.

PRESSED STEEL CAR'S GAINS The value of the probable output of the Pressed Steel Car Company for 1923 is placed at \$60,200,000, compared with \$29,869,903 in 1922.

The Public

A condensed statement of the demands upon which the present strike is based is as follows:

A reduction from 8 to 7 hours' work a day. As recess time of one-half hour is given, this would mean only 61/2 hours of actual

A large increase in wages, which, together with the shorter hours, would mean an increase of nearly 50% in operators' wage

We believe these demands are unreasonable and unwarranted for the following reasons:

- 1. The hours of work are already less than in comparable industries.
- 2. The present wages are the maximum war-time wages, no reductions having been made as in most other industries.
- 3. The general satisfaction with our wage and working conditions, as shown by a labor turnover of less than 16% a year, whereas, in general mercantile or manufacturing concerns, a labor turnover ranging from 50% to 100% is considered normal.
- 4. Long waiting lists of desirable applicants, and these without advertising.
 - 5. Steady employment for 52 weeks in the year.
 - 6. Annual vacations of two weeks with full pay.
 - 7. In large offices lunches provided at cost of food and its
- preparation, the overhead cost being borne by the Company. 8. A Benefit Plan, provided without cost to employees, under
- which they are paid for time lost due to illness. 9. Operating rooms, recreation rooms and all other working conditions are of the best.

We believe the wages and working conditions of our employees, when measured by every reasonable standard, are eminently fair and just, and we ask the consideration of the public for any inconvenience which they may temporarily encounter during the steady restoration of service in the relatively small number of exchanges still affected by the strike.

New England Telephone & Telegraph Company GEORGE H. DRESSER, General Manager.

STOCKS HAVE REACTIONARY PRICE TREND

General Advance Checked by Sharp Declines in Some of the Industrials

Prices continued their upward course at the opening of today's New York stock market, with the initial demand centered in the motors, motor accessories, rails and a few specialities. Studebaker, Stewart-Warner Speedometer, Union Pacific, and Baltimore & Ohio opened 1 to 1% higher, but Northern Pacific dropped 1%. Some of the minor oils also were heavy.

heavy.

The advance had become quite general when weakness developed in Bethlehem Steel which dropped 4 points, and Chandler Motors, off 2, each at new low prices for the year. Selling of these issues halted the upward trend in other quarters.

Several of the equipments, chemicals, sugars, food and rails had advanced a point or more before the buying power was exhausted. Republic Steel also dropped 2 points to a new low.

new low. Foreign exchanges opened slightly lower.

· Steels Heavily Sold Publication in the financial district Publication in the financial district of unfavorable steel trade advices apparently was responsible for the heavy selling of the independent steel shares, nearly all of which broke through their previous low prices for the year. This weakness also extended to the equipments and merchandising issues and a few specialities. The motors, public utilities, coppers, sugars and rails, however, showed indications of good buying support.

showed indications of good support.

Call money opened at 6 per cent.
Selling of railroad shares was aggressively conducted after midday, and when Union Pacific, Canadian Pacific, Northern Pacific, Great Northern preferred and Chicago & Northwestern dropped 1% to 3% points, mostly to new low prices for the year, the general list also became considerably weaker. A number of industrials and specialties established new low prices for the year, including U. S. Alcohol, Famous Players and Sears Roebuck at declines of 3 points each.

Bonds Fairly Firm

Bonds Fairly Firm

Advances predominated in the irregular price movement of today's early trading in bonds. Mexican 4s and 5s each advanced more than two points on the announcement that a call for the deposit of Mexican bonds would be issued July 9, and several other foreign government issues gained fractionally. Railroad mortgages showed improved demand, New gained fractionally. Railroad mortgages showed improved demand, New
Haven convertible 6s and New Orleans
Texas & Mexico 5s each advancing 2.
Third Avenue adjustment 5s also
moved up 2 points.

Industrial liens were relatively
dull, but most of the early transactions were at slightly higher prices.
Virginia Carolina Chemical 7½s, with
warrants, and the 7s continued up-

warrants, and the 7s continued upward, gaining more than 2 point United States Government bonds wer stronger, advances ranging from 1to 3-32 of a point.

ELIMINATION OF PUBLIC ACCOUNT IN STOCK MARKET

Decline in Prices From the Year's High Level Is Substantial

NEW YORK, June 29—Technical weakness is one of the most influential factors in the steady decline in stock values since late in March. This impairment of the market's internal structure resulted from the heavy buying of a speculative character,

much of it poorly protected.

Record-breaking automobile produc tion and steel outturn, unprecedented railway traffic and bank clearings proved strong influences in building up an outside following which has been the target at which professional attacks have been directed in the last three months.

Developments in the trade situation hold the longer future of the market in their power. But no matter what happens in this direction, it is obvious that the drastic shakeout resulting the elimination of an overcrowded public account has created a technical situation which places prices in line for a substantial rally.

Earnings running up to 50 per cent of their current market value in the instances of Republic Iron & Steel and Baltimore & Ohio show why stocks have appealed so strongly this year to the general public. Other striking examples are Studebaker, with 1923 earnings estimated at \$30 a share; American Locomotive at \$40, Baldwin at \$38. New York Central at \$22, and the common in the preceding year. Atchison at \$20.

Stocks of this character have born the brunt of recent selling pressur indicating that bear operators foun them most vulnerable because of th public interest in them.

The following table compares the 192 high prices of several popular issue with Wednesday's closing figures and gives a per share estimate of 1923

share, payable July 31 to stock of record

regular quarterly dividend of \$1.50 a share, payable July 31 to stock of record July 14. Bell, Telephone of Pennsylvania declared the regular quarterly \$2 dividend, payable June 30 to stock of record June 28. Exchange Trust Company, Boston, declared the usual quarterly dividend of 3 per cent, payable July 2 stock of record June 28. United States Finishing declared the regular quarterly dividends of 134 per cent on the common, payable July 16 to stock of record June 28. American Glue Company declared the regular quarterly dividend of \$2 on the preferred stock, payable Aug. 1 to stock of record July 16. Directors of Loew's Boston Theaters Company have authorized a dividend of 4 per cent, payable in preferred stock of the State Theater Company. Directors also authorized the purchase of additional preferred stock of the State Theater Company at 90 to enable the company to distribute the dividend, which will be payable to stockholders of record July 2, as soon after the record date as possible.

Jersey Central Railroad declared an

July 2, as soon after the record date as possible.

Jersey Central Railroad declared an extra dividend of 2 per cent and the regular quarterity dividend of 2 per cent. The regular is payable July 16 to stock of record July 11. The extra dividend is payable Aug. 15 to stock of record Aug. 10. The extra dividend of 2 per cent is the usual extra declared at this period of the year.

Boston Consolidated Gas Company declared the regular 2 per cent on the common, payable June 29 to stock of record July 14. Beacon Oil declared a dividend of 11.37½ a share on the preferred, payable Aug. 1 to stock of record July 14. Beacon Oil declared a dividend of 2 per cent, payable June 29 to stock of record June 28. Bush Terminal declared the regular semiannual dividends of \$2.50 on the common and \$3 on the preferred, both payable July 16 to stock of record June 28. Bush Terminal declared the regular semiannual dividends of \$2.50 on the common and \$3 on the preferred, both payable July 16 to stock of record July 9.

NORTHERN PACIFIC REPORT The Northern Pacific road reports to the New York Stock Exchange for three months ended March 31, 1923: Gross earnings, \$22.624.514; net after taxes. \$478.313; total income, \$4.792.205; in-terest, rentals etc., \$3.828.326; net inearnings, 3478,313; total income, \$4.792,205; in-terest, rentals etc., \$3.828,326; net in-come, \$963,878; dividends, \$3,100,000;

MEXICAN ISSUES STRONG ON THE LONDON EXCHANGE

LONDON, June 29—Mexican issues were strong on the stock exchange here today on reports that progress is being made toward the reorganization

of the Government debt.

Gilt-edge issues were steady. Dollar stocks were firmer on the improvement in the New York market. Home

rails were easier.

Argentine rails were strong on hopes of coming dividends. French loans hardened. Kaffirs were steady. Oils were better. Royal Dutch was 30, Shell Transport 3 13-16, and Mexican Eagle 1. Rubber issues sagged.
Industrials on the whole had a
cheerful tone. Rio Tintos was 364;

Hudson's Bay 5%.

The markets generally presented a narrow appearance due to the usual week-end dullness.

AMERICAN CAR & FOUNDRY CO. ANNUAL REPORT

Balance for Common Stock Is \$13.71 Compared With \$14.94 in the Previous Year

The American Car & Foundry Company for the year ended April 30, 1923, has a balance, after charges, federal and preferred dividends, of \$4,113,610. equal to \$13.71 a share on \$30,000,000 common stock, compared fall of 1922 it was selling under \$30 with \$4,483,319 or \$14.94 a share on and its present price is about \$31.

Remarks of President W. H. Woodin, pesident, says, it

WINNIPEG, Man., June 24 (Special correspondence)—The provincial Government has sold \$1,000,000 one-year amount of business of the special pany begins its new year with a mount of business of that at the beginning of the preceding region and the p

in New York funds, and is for one year only. It will be used to repay a sterling issue falling due July 1.

Tenders were asked for an issue of the company's miscellaneous business, as usual, has been sufficient business, as usual, has been sufficient

Company's Inventory

While the inventory of materials on hand shown on the general, balance sheet is greater in money value than at the close of the preceding year, it is not proportionately greater in actual quantity. It is not in excess of the company's reasonable requirements, and substantially all of it will be absorbed in the completion of work in course.

in the completion of work in course or on the books. In the report of last year attention was called to the fact that "the comwas called to the tat that the company's resources in the way of investments are fluid and can readily be turned into cash to meet the demands of increased business." The demands of the year's business have necessitated of the year's business have necessitated the conversion into inventory and accounts and notes receivable of a large part of the item of United States Certificates of Indebtedness, Liberty bonds, Victory notes, and United States Treasury notes, shown on the balance sheet of April 30, 1922.

The company enters upon its new year in sound financial condition and with its affairs in healthy and satisfactory shape.

STERLING EXCHANGE

LONDON, June 29-In reference to the weakness of sterling exchange it New York, there is doubt that the previous advance in British exchange was due in part to American purchases of British securities for the

KELLOGG SWITCHBOARD CO.

The Kellogg Switchboard Company, for the year ended Dec. 31, 1922, reports gross sales of \$5,695.823, compared with \$5.455.396 in 1921, and net income of \$603,285 after expenses, interest, inventory adjustment, federal tax, and other items, compared with tax, and other items, compared with 10 cents.

RUBBER CONCERNS CUT TIRE PRICES TO COMMON LEVEL

Big Five" Meet Firestone's Reduction-Are Selling Now Little Above Low

The Big Five in the tire industry— Goodyear, Kelly-Springfield, Goodrich, United States and Fisk—have met the 10 per cent cut in tire prices an-nounced by Firestone two weeks ago and placed tire prices on levels preva-lent the first of the year.

lent the first of the year.

The lateness of the spring selling season and heavy forward buying of tires the last three months of 1922 and the first quarter of this year, before the 10 per cent advance in prices in March, caused a heavy accumula tion of stocks in dealers' hands, with the result that little actual business was done at the advanced prices, which were in effect only three nonths.

The margin of actual profit for the companies that can hold their share of the business will not, therefore, be greatly disturbed by the cut in prices. Tire prices have declined since 1920 in proportion to the cost of raw materials entering into their manufacture High wages still are paid to labor, but they have been offset to some de-gree by increased efficiency and larger output. Tires are now selling only slightly above the lowest price at which they ever sold, and substantially below their high. To illustrate: A 32x4 cord sold in 1920 around \$55. In the and its present price is about \$31. Cotton, not rubber, is the most im-

portant factor in the production of pneumatic rubber tires, and cotton tabrics have declined nearly 80 per cent since 1920.

When the above casing was selling at \$55 the price of carded Egyptian cord fabric was \$2.60 a pound. In 1922 it was 62 cents a pound, which is around its present selling price. The price of crude rubber, which fluctuated between 40 and 68 cents a pound in 1920, reached 14 cents in 1922 and is now around 26 cents.

The following table shows current The balance sheet as of April 30, list prices on a standard line, com-

LONDON QUOTATIONS

LONDON, June 29—Consols for money here today were 58%. Grand Trunk %, De Beers 13%. Rand Mines 2%. Money—1% per cent. Discount rates: short bills 2% per cent; three months' bills 2% per cent.

MAY EARNINGS OF CLASS I ROADS FAR AHEAD OF MAY, 1922

Twenty-three Class 1 roads for May show net earnings of \$31,234,648, compared with \$12,487,251 for May, 1922. In May last year gross of these roads was \$4.3 per cent of the total gross for all Class 1 roads. If that ratio holds this year, returns of the roads thus far reporting would indicate net for all Class 1 carriers in May of \$91,034,000, or an annual rate, weighted 034,000, or an annual rate, weighted for seasonal fluctuations of traffic, of \$1,230,000,000. The indicated net for May compares

with actual April net for all Class 1 roads of \$83,201,312 and with the net for May, 1922, of \$61,980,619. Indicated net for May, 1923, is at the annual rate of 6.42 per cent on an investment of \$19,175,000,000, compared with an actual annual rate of return in April of 6.48 per cent.

GERMANY TRIES TO CARRY ON WITHOUT RUHR

Manufacturers Withdrawing Into Quieter Zone-Mark Stabilization Ineffective

LONDON, June 29 (By Cable) — Migration has set in of industries from the Ruhr to unoccupied Germany, particularly to Hamburg, Hanover and Bradenburg, where fuel or raw materials are near or can be transported

cheaply. Manufacturers apparently believe the Rhineland must be sacrificed to save the Ruhr, and the Ruhr will be occupied for several years. Government subsidiaries still permit remaining in the Ruhr, but farsighted manu-facturers are taking the lead in getting into a quieter zone.

Glasenapp, director of the Reichsbank, estimates the French have requisitioned a total of 200,000,000,000 marks in the occupied area, recently taking 52,000,000,000 marks from the Reichsbank and Dortmund. He charges the French with further mark forgeries with requisitioned German plates.

Cut Off From Supplies

Leading Ruhr steel manufacturers have been cut off from iron and coal supplies: the Krupps from blast furnaces at Rhinehausen, Guthoffnung-shutte from coal at Mulheim and Friedrich Wilhelm mines from most of their iron ore. The result has caused further radical reductions in Ruhr steel production.

Falling of the mark and withdrawal of most of the German Government's export restrictions stimulated export orders. The consequence is that industry in unoccupied Germany is again operating at about the rate before the Ruhr occupation, and is buying English coal and Czech steel to replace the

Ruhr goods.

The Ruhr is operating at one-fourth the rate before occupation. Twenty-six out of 74 blast furnaces are working. while coke oven owners have agreed to operate at 15 per cent capacity, or just enough to meet local needs.

American Buyers' Troubles

Several months' negotiations with American buyers to export Ruhr goods have yielded nothing, when neither seller nor buyer was willing to carry the risk of possible confiscation before the goods left the military zone.

It is feared that there may be a

possible countermanding of permit from Paris, holding up 100,000 tons of steel for which permits have been most affected. In the face granted to American steel and auto- factory earnings statements mobile companies, likewise a ship-ment of several million dollars' worth ticularly income and adjustment is-

Instead of stabilizing the mark and from the highs for the year. checking speculation, the German In the industrial list pressure has Government's latest money market been concentrated on the obligations the confusion in German money exvolume of foreign business have de-clared war on Ebert's decree to centralize money exchange control in Berlin.

Stabilization Ineffective

BONDS HAVE HAD A BIG DECLINE

Slump Begins Earlier Than Stock Reaction and Losses Range From 3 to 18 Points

Although less widely advertised the extent of the liquidation in certain sections of the bond list has been scarcely less violent than the liquidation in stocks. The slump in the bond market began considerably earlier than the slump in stocks. From the peak of bond prices reached in mid-September, 1922, quo-

tations receded rather rapidly until late November, rallied a little, then receded further to the last of March. From the March low level bonds gradually crept up for nearly two months, but for the last 30 days the

market has once more been soft.

The most volatile issues have been most affected. In the face of satissues, have dropped from 3 to 18 points In the industrial list pressure has

regulations have further complicated of a few companies whose position was known to be rather unsatisfacchanges. Hamburg and Cologne with tory. A few of the less stable foreign close English connections and a large bonds have also suffered rather severely. The following table compares the

prices of thirty active bonds with the highs for the year, giving the 1923 high, Thursday's low, and the number

insufficiently studied, it is evident that some such control is essential to prevent wild speculation and limit mark fluctuations. The essential provisions of the new decree make illegal and nullifies transactions which do not conform to the daily official exchange rate. It is illegal to transact business in unquoted moneys. An illegal transaction is nullified and the Government can condemn to three years in prison and confiscate the money involved.

President Havenstein of the Reichsbank regards such a measure as unworkable, owing to the absence of an enormous mechanism aand with heavy industry openly hostile. The general "flight from the mark," combined with a large wage increase, has flooded the local market with paper marks. Manufacturers are covering the risks of price fluctuations through purchases of the German gold mark loan, which last March received but scant subscription, but is now attractive because it is freely negotiable. It is FICHIT FORFICNI. of points decline:

EIGHT FOREIGN COUNTRIES TO HAVE WHEAT YIELD GAINS

WASHINGTON, June 28—An increase of almost 100,000,000 bushels of wheat over last year's crops is forecast in eight foreign countries that a year ago produced more than one-fifth of the total world crop. Radiograms from the International

Institute of Agriculture at Rome, just received at the United States Depart-W. C. Langley, New York stock broker and owner of the mills, said today.

He declined to disclose the names of the persons negotiating for the property, other than that one offer property, other than that one offer year.

TRADE CONVENTION DATES FOR 1924

Next year's National Foreign Trade Convention in Boston will be held on June 4, 5 and 6.

This was decided yesterday at a

conference with O. K. Davis, secretary of the National Foreign Trade Coun-cil, held with Charles F. Weed, chairman of the local convention commit-tee; W. Irving Bullard, second vice-president of the Boston Chamber of Commerce, and George A. Sagendorph, chairman of the chamber's committee

PRESSED STEEL CAR IS TO LIST \$6,000,000 TEN-YEAR GOLD 5S

NEW YORK, June 29-Pressed Steel Car Company has received the Stock Exchange approval of its application to list \$6,000,000 10 year convertible gold 5s, issued Dec. 30, 1922. The bonds are convertible into common stock, par for par, after Jan. 1, 1924.

stock, par for par, after Jan. 1, 1924.

The company states its depreciation policy since 1916 has provided for an average of 10 per cent a year for machinery and equipment and an average of 5 per cent on buildings.

The total number of employees at various plants is given as 11,442. The estimated output for 1923 of Pressed Steel Car and subsidiaries is \$60,200,000, compared with \$28,404,227 in 1922.

The World's Great Capitals The Week in Berlin =

of the universities of Freiburg, Heidelberg and Giessen. Since the total number of women students at these universities, according to the report, is \$147, the number of foreign women students amounts to 13 per cent, whereas the number of foreign male students is only 9 per cent of the total umber of male students. Of the total number of German students, the report continues, only 10 per cent are women, whereas among the foreign students in Germany 14 per cent are women.

With the beginning of summer, great activity is noticeable in German sports. Seldom before have the athletic grounds, football fields, and tennis courts here been so crowded as they are today. New stadiums are being opened in Berlin and three big ath-letic and football fields have been turned over to the public recently. Berlin has just had a "Sport Week" and German athletic teams are train-ing energetically for the Gothenburg meeting in July, which is the first big international sports meeting since the war in which Germans will participate. The German press has started a subscription list to enable the various teams to make the journey to Sweden. The Government has offered ,000,000,000 marks to aid in furthering the sport movement in Germany.

Parents of the pupils of two public schools in Berlin have entered into a protest strike against the delay in the completion of new school buildings which are to replace the present inadequate quarters. This means that the children will not go to school until the municipal authorities have taken steps to accelerate the completion of steps to accelerate the new buildings.

The financial distress in which the so-called German middle class finds itself today on account of the increasing cost of living is reacting espe-cially upon the German clergy, which sees itself unable to exist on the meager wages paid by the churches. Many clergymen, therefore, have been obliged to take up some side profession, at which they can work during their free hours. In Saxony alone 300 clergymen are doing some kind of work in their leisure hours to increase their salaries. In Dresden nine clergymen work in banks. Others have found positions as clerks, gardeners, workmen and miners. Where the husband is not in a position to work during his free time, his wife is doing it. Many wives of clergymen are working in offices, or as dressmakers

or seamstresses. The municipality of Berlin, the expenditures of which exceed revenue, has found great interest in a report from Moscow that the municipal administration here is operating at much lower cost than the Moscow Administration. This statement was contained in a report submitted to the Moscow Council by Mr. Lavroff, member of a

cajoled into the big brown tents, according to Henry T. Harrison of Chi-

cago, proprietor of one of the Red-path Chautauquas. Offers to address

Washington, June 29

Berlin, June 29
The influx of foreign atudents into gees, has largely increased the number of women students at the German universities. According to academic reports there are now 963 foreign women students at the German universities, with the exception of the universities of Freiburg, Heidelberg and Giessen. Since the total number of women students at these universities, according to the report, is \$147, the number of foreign women

by modernizing its telephone system the Federal Ministry of Posts, which owns all telephone lines in Germany, has avoided an expense of more than 23,000,000,000 marks and has increased its revenue by 24,000,-000,000 marks a year. This was obtained by a new system of coupling the telephone wires which permits three conversations on two wires. cost about 23,500,000,000 marks.

At a business meeting of the Foreign Press Association in Berlin it was decided to request the federal, Prussian, and municipal authorities to facilitate the work of the foreign jour-nalists in Berlin. This pertains espe-cially to the prolongation of the permission to stay in Germany, as well as to passport matters and the problem of obtaining suitable accommodations. This decision was brought about by the fact that foreign journalists who have been sent out to Germany on assignment by their newspapers do not receive the help they need from the authorities. If they stay here longer than six months they are summoned to pay taxes, are obliged to pass hours at police headquarters to renew their permission to stay in Germany and whenever they wish to leave the country there are many compli-cated formalities with which they must comply.

TELEGRAM DEFEATS MONITOR
The Christian Science Monitor baseball team lost to the Boston Evening
Telegram in a Newspaper League con-Telegram in a Newspaper League contest at the Columbus Park playgrounds yesterday, by the score of 11 to 6. Errors were prominent on the part of both teams; but the Monitor was chief offender. N. M. Teehan, third baseman for the victors, was the star at bat, making two triples which figured largely in the scoring. T. L. Woodworth, Monitor second baseman, made the longest hit of the game, a home run. Innings—

A MONG the scores which were turned in last week for publication in this week's archery Bulletin of the series of weekly bulletins which are being issued by Louis C. Smith, president of The Newton Archers, are new high records for the season in the Yoyk round, the American round, the National round, the American round and the women's team round. This shows that the archers, and especially those who are planning to attend the annual tournament of the Eastern Archery Association at Jersey City next week, have been diligently practicing in anticipation of this event.

Another interesting fact is that one

is planning to build a subway of its own next year.

The willingness of foreign students to help their German brethren who often have to struggle to continue often have to struggle to continue their studies under present economic conditions, was strikingly brought out at a recent meeting called by foreign students in Munich to discuss ways and means by which they could assist.

The previous high records that one of these new high records, that in the York round, was made by Dr. R. P. Elmer of Wayne, Pa., who is the present conditions, was strikingly brought out at a recent meeting called by foreign students in Munich to discuss ways and means by which they could assist.

students in Munich to discuss ways and means by which they could assist Germans who were in financial distress. Students of 20 nationalities, studying in 16 different German universities, were present. A board was formed on which every nationality has fits representative. This board is to take all necessary steps to increase the student relief movement.

By modernizing its telephone system the Federal Ministry of Posts, the student relief movement.

By modernizing its telephone system the Federal Ministry of Posts, the student relief movement.

In the American round the new high

Elmer made 114 hits, 526 score.

In the American round the new high score was turned in by W. H. Palmer Jr., of Wayne, Pa. Mr. Palmer's score was 90 hits, 586 score. This is a perfect score as regards hits and is considerably higher than the best score made at the last annual tournament of the National Archery Association, at which time Dr. Elmer made 90 hits, 530

Thus about 20,000 kilometers of new wire were saved, which would have cost about 23,500,000,000 marks.

The new high scores turned in by Miss Smith are 69 hits, 373 score in the National round and 69 hits, 431 score in the Columbia round. The previous in the Columbia round. The previous high record in the National round was held by Miss Smith and was 67 hits, 355 score. In the Columbia round the previous record was held by Mrs. E. W. Frentz, of Melrose, Mass., and was 66 hits, 392 score. These new scores of Miss Smith are both higher than the scores on which she won her championship title at the annual tournament last August. Mrs. Frentz, who held the previous high record in the team round of 84 hits, 432 score, has now bettered this by making 92 hits, 542 score.

The two title holders seem to be in championship form and as both are expecting to attend the tournament of the Eastern Archery Association next week some good shooting is expected. A new name appearing in this latest Bulletin is that of Virgil Person of Wayne, Pa., who turned in a very creditable score for a novice of 48 hits, 220 score in the American round and 24 hits, 90 score in the York round.

The officers of the Eastern Archery Association report a very marked interest in the coming tournament at high record in the National round was

Association report a very marked in-terest in the coming tournament at Jersey City with the promise of a large attendance.

The headquarters for the archers attending the tournament is Hotel Robert Treat, Newark, N. J., and the shooting will be held at the Hudson Country

will be held at the Hudson Country Park. The tournament is scheduled for three days, July 3, 4 and 5, and the following program is announced:

Tuesday, July 3, 9:30 a. m.—Single York round for men; single National round for women. 2 p. m.—Single American round for men; single Columbia round for women.

Wednesday, July 4, 9:30 a. m.—Single York round for men; single National round for women. 2 p. m.—Single American round for men; single Golumbia round for women. Thursday, July 5—Special contests; the annual meeting for the election of officers and other business at 7 p. m.

The following are the scores appearing in this week's Bulletin:

GUILFORD TIES GOLF RECORD

NEWTON, Mass., June 29—Eight
players, including J. P. Gailford, have
advanced to the third round of the
Massachusetts amateur golf championship tournament. Guilford, former
champion, was given quite a battle in
the first round before defeating F. C.
Newton. The Country Club. 1 up, 19
boles. In the second round he put out
W. A. Whitcomb of Worcester, 4 and 3.
In this match, after playing the by
holes, he tied the amateur competitive
record for the course, 73, a mark that
its credited to Ray Gordon of Brae
Burn, where the tournament is being
held. W. A. Jackson, W. H. Workman,
R. W. Brown, H. C. Paul, Gordon, K.
E. Mosser and J. H. Eaton are the
other survivors, F. W. W. other survivors,

HELD MEETS LEGG IN THE SEMIFINALS

Aspect of Trans-Mississippi Golf Changes When Johnson Loses

tournament, and will oppose H. G. Legg, in the semifinals today, in what is expected to be the most brilliant and possibly the deciding match of the

The aspect of the tournament was materially changed yesterday, when R. E. Bockenkamp of St. Louis, eliminated H. R. Johnson, a member of the 1923 United States Walker Cup team, in a 36-hole match in the third round, 3 and 2

Both played erratic golf. It was more a matter of losing holes than of winning them, but Bockenkamp was guilty of the fewer misplays and clung to a lead established in the second hole without once being brought to even terms. He was 2 up at the end of the morning round and increased his lead to four holes at the turn of the afternoon round. Thereafter Johnson braced for a moment but found that par golf was not good enough and fought to overcome his

opponent's lead.

Bockenkamp will meet J. W. Redick, one time champion of Nebraska, in the semifinals. Redick survived by a 2-and-1 victory over W. L. Velie Jr. of Rock Island, in the most warmly contested match of the day. Neither player was more than 2 up, but both attained that advantage several times

during the day.

H. G. Legg, who has won the TransMississippi title five times, moved a
step nearer his sixth title by eliminating James Manion of St. Louis, 3 and 2. Legg was forced to do a 72 in morning round, the best golf of the tournament, to establish a lead gedly during the afternoon. His 34 on the homeward nine in the morning established an amateurs' record for the course.

MISS GOURLAY WINS FRENCH GOLF FINAL

CHANTILLY, France, June 28 (P)_ Miss Molly Gourlay of Camberley Heath, England, won the final in the international women's golf championship today, defeating Mile. Pauline De Bellet of France, 3 and 2.

The French girl, displaying a steady

game, was 3 up at the fourth hole and was still leading, 2 up, at the turn. She weakened coming home, Miss Gourlay squaring the match on the eleventh green. Miss Gourlay was dormie 3 at the fifteenth and won the match when the sixteenth was halved. This year was the first time a roman player had reached the finals since the war.

Brief communications are welcomed, but the editor must remain sole judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions so presented. Anonymous letters are destroyed unread,

To the Editor of the Christian Science

I try to dig out the real news about folks and things in my little corner of the world and play them up in print, just like a metropolitan paper plays up the Nation's interests or a double murder in New York.

It is a worthy alm to print "real news." Real news is constructive. But sensational news and crime news are destructive. Why publish a "double murder?" Why clutter the minds of men, women and children with unwholesome slush? Why not feature news that make for a better world? news that make for a better world? May not the fearlessness of an editor

May not the fearlessness of an editor end in destructive journalism? This editor, cites an incident where a prominent young man of the village absconded with bank funds. The father and mother of the young man were friends of the editor. But he printed the story in all of its details, together with pictures of the boy and a young woman "privately believed" to have led him astray, and added "it was a harrowing story." To have printed a pic-

"Human 'Nature as Seen by Country Editor"

To the Editor of the Christian Science Monitor;

A recent article under the above caption in a popular magazine seems to the said:

To the Editor of the Christian Science Monitor;

A recent article under the above caption in a popular magazine seems to her heart did disturb his slumbers, but he said: he said:

The great metropolitan daily may break 100 hearts in the morning, but the publisher loses no sleep, the reac-tions never reach him. Another frank statement. But how about the "reactions"? Is any editor

about the "reactions"? Is any editor immune from a wrong done in print? May he not today be "like a green bay tree." but will he "spread" tomorrow? The editor gets his spiritual facts badly twisted in an effort to justify selfishness. He says:

And yet I am not condemning selfishness. The world's greatest teacher did not condemn selfishness, if I have read the record right. Jesus gave the world only two commandments: the first to love God, and the other to love one's neighbor as one's self. The great teacher knew that there could be no greater love than self-love. He did not inveigh against this self-love; he accepted it as a matter of fact.

Has the supreme sacrifice passed over

Has the supreme sacrifice passed over the head of this editor? Jesus' Sermon on the Mount abounds in unselfishness, meckness and mercy.

How can anyone read that master-piece of unselfed thought and conclude that Jesus accepted selfishness "as a matter of fact"?

However, this editor who would feature a double murder, print harrowing details about a friend's son, and who does not condemn selfahness, says:

The yellow journalist thrives on the

WIMBLEDON, June 29 (AP)—Playing his most powerful game, W. M. Johnston, No. 2 in the American lawn tennis ranking list, decisively defeated Vincent Richards, the remarkable New York youth, on the Wimbledon grandstand court today, while England's King and Queen looked on.

Johnston's attack was most determined, and Richards' finished, but less powerful, game was unavailing against the Californian's terrific driving and all-around court generalship. score was 6—4, 6—3, 7—5.

By his victory Johnston put himself a long stride nearer the world's sin-gles championship—the goal for which other of the two visiting stars should be eliminated. Johnston showed beyond doubt that he was the stars and the stars are the stars and the stars are the stars and the stars are the s he is striving. The fortune of the draw yond doubt that he was the better qualified to carry on the American

Richards, because of his youth and winning mannerisms, had the support of the majority of the vast crowd that packed the stadium and jammed all available standing space, but the winner was warmly cheered.

Richards put up a fine battle. With the score of the third set at 6-2 in Johnston's favor the New Yorker began a battle that was dazzling and forced the score to 5-all, only to lose at 7-5. His last service was a double fault: the second ball hit the net cord and went over, but was out by an

Johnston's method throughout was of the draw. R. E. Knepper, Princeton to keep driving deep to Richard's back-hand; then, when he had the youth and conqueror of C. J. H. Tolley of lodged in a far corner, to come to the England in last year's United States net and slash a volley to the other side of the court. Richards also often amateur tournament, is in the other half. Past performances indicate that they should survive to the finals came to the net and there were frequent thrilling exchanges from midcourt, sometimes with both men close to the barrier. It was Johnston's scheduled for today. Knepper defeated J. G. McMahon of Yale and New York stinging forehand with its low trajectory and accuracy which in the end water when McMahon's ball landed near a drain pipe. Knepper main

The committee arranged the sched-tained that McMahon could not lift that the star match should and he did not. The summary: not start until after the arrival of the INTERCOLLEGIATE GOLF CHAMroyal fans. Their Majesties, with Princess Mary and their entourage J. J. Mapes, Harvard, defeated C. H. arrived at 3 o'clock. Every seat was Conklin, Yale, 4 and 3. H. W. Comstock, Williams, defeated D. filled and standing room was jammed

filled and standing room was jammed when Richards and Johnston appeared.

The weather was ideal, with a bright sun and soft breeze.

King George called the two Americans to the royal box, welcomed them and chatted a few moments before the start of the match.

Richards won the first point with a swift passing volley during an exchange of shots at the net and took the first game on his own service, at 4—2. Johnston took the second game after it had gone to deuce by drawing Richards to the corners and then putting over swift passing shots to the other side. Richards often came to the net for telling volleys.

The third game went to Richards, 4 points to 2. Johnston took the fourth at 4—1. Both were serving well, and the exchanges were fast and furious. Johnston broke through Richards' service to win the fifth game, 4 points to 1, and then won his own service, at 3. J. A. Fuller, Princeton, defeated E. J. W. Crookson, Penn State, defeated D. A. Williams, Harvard, 5 and 3.

H. W. Comstock, Williams, defeated Burton Mudge. Princeton, 1 up (19 holes).

W. B. Sparks, Princeton, defeated Clark Hodder, Harvard, 1 up (29 holes).

C. B. Bowles, Yale, defeated Gurk Hodder, Harvard, 1 up (29 holes).

C. B. Bowles, Yale, defeated G. F. Lambrach, 1 up (20 holes).

W. B. Sparks, Princeton, defeated R. M. Clough, Harvard, 4 and 2.

J. W. B. Sparks, Princeton, defeated D. A. Williams, defeated R. M. Clough, Harvard, 4 and 2.

R. E. Knepper, Princeton,

service to win the fifth game, 4 points to 1, and then won his own service, 4—2.

Richards took the seventh game at great speed, allowing Johnston only one point and finishing with a delicate volley after driving his opponent to a back corner. Johnston took the eighth at 4—2. Richards twice aced Johnston in the ninth game to win it at 6 points to 4, but the latter came through on his own service and took the final game 6—4, clinching the first set at 6 games to 4.

Second Round

W. B. Sparks, Princeton, defeated H. W. Comstock, Williams, 5 and 3.

A. J. Shannon, Princeton, defeated J. M. Satchelder, Dartmouth, 3 and 1.

A. J. Shannon, Princeton, defeated A. R. Parker Jr., Harvard, 2 up.

R. E. Knepper, Princeton, defeated A. R. Parker Jr., Harvard, 2 up.

McMahon, Yale, 1 up.

Dexter Cummings, Yale, defeated G. H. H. H. J. J. Mapes, Harvard defeated C. L. Pierson, Harvard, 2 and 1.

J. W. Crookston, Penn State, defeated J. W. Schools, Yale, 6 and 4.

J. C. Ward, Williams, defeated J. W. Schools, Yale, 6 and 4.

J. C. Ward, Williams, defeated J. W. Schools, Yale, 6 and 4.

J. C. Ward, Williams, defeated J. W. Schools, Yale, 6 and 4.

The Californian started off the sec ond set at top speed. Coming to the net he broke throgh Richards' service and allowed the New Yorker only two points. He won the second game by a like score. Richards took the third at 4-3, when Johnston netted two balls and twice drove out of bounds. Johnston took the fourth game at 6-4 and Richards, with a double fault, lost his own service in the fifth game, 4-2. Richards displayed the most brilliant volleying yet seen at Wimble-don in breaking through Johnston's service to win the sixth at 4-2. Then he took the seventh at love. Johnston

Lipton Will Not Race for Cup Until 1925

By Cable from Monitor Bureau London, England, June 29

IN an interview with Sir Thomas
Lipton by Heary J. Grandison
regarding the statements being
circulated intimating the possibility
of another America Cup contest next year, Sir Lipton stated that it is his intention to challenge again, but when asked if he purposed sending a challenge now for a contest next year, he replied, "No. a challenge will be sent next year for a contest in 1925."

Questions which he put to Mr. Grandison in regard to the selection of a designer, entirely discount the statements made in some quarters that Fife and Nicholson are to collaborate in the production of the new boat. Such an arrangement, of course, is most unpracticable. Such eminent designers have their own theories, and it is difficult to imagine how they could work successfully together. Sir Thomas stated that it was the ambition of his life to win

came back in the eighth to win at 5-3 and then, with fine placements and hard forehand drives which his op-ponent seemed unable to lift, took the ninth at 4-2 and the set at 6 games

The point score: .2 7 2 4 4 4 1 4 4 6—38—6 .4 5 4 1 1 2 4 2 6 4—33—4 Second Set ...4 4 2 6 4 2 0 5 4-31-6

GILL SIGNS WITH CINCINNATI
WORCESTER, Mass., June 29—H. F.
Gill of Brockton, left-handed pitcher for the Holy Cross College nine until his graduation this month, has signed a contract to play with the Cincinnati Reds. He will join the club in Pitts-burgh.

Today, weather permitting, the champion high school nines of Chicago and New York City will meet at the Polo Grounds. George Washington High School will endeavor to uphold the scholastic diamond prestige of the east, and will be opposed by Lindblom High. Baseball and civic officials have taken great interest in the scheduled championship game. ATLANTIC CITY, June 29—Harlin McCoy, 14, of Columbus, O., today won the marble shooting championship of the United States, defeating 11-year-old Sammy Schneider, the "shootin' flash" of St. Louis, in the final round of the national tournament.

SEMIFINALS IN DOUBLES TODAY

Three Matches Scheduled-Fischer and Emerson Play for Singles Title Tomorrow

PHILADELPHIA, June 29 - Only three matches, all in doubles, were scheduled for today in the national P.C. intercollegiate tennis tournament at the Merion Cricket Club. F. T. Ander-517 son and G. B. Emerson of Columbia University will meet L. N. White and Louis Thalheimer, University of Texas, in a third-round match, after which intercollegiate tennis tournament at the semifinals will be held.

L. E. Williams and A. W. Jones of Yale University will oppose P. A. Bettens and W. J. Bates of the University of California in one of the semifinals, while P. F. Neer and J. M. Davies of Leland Stanford Junior University will meet the winners of the third round match in the other.

C. H. Fischer of the Philadelphia New York defeated Boston for the second straight time at Braves Field will meet in the final round for the yesterday, thus bringing its streak of singles championship tomorrow afternoon as a result of their victories in the semifinals yesterday. Fischer won from Anderson, former

and, with the exception of the second national indoor champion, in a three-Fischer, former University of Pennsylvania captain, after losing the first

set to Anderson, rallied finely. After dividing the first four games of the opening set, Anderson went into the lead by winning the fifth, sixth and seventh games. Fischer, on his own service, won the eighth game at love, but Anderson took the set by duplicating Fischer's feat in the ninth

prise, dropped the first set of his match to Ingraham, but showed a remarkable comeback to defeat the Harvard representative. In the first set, after Emerson won

the opening game, Ingraham took the second, and games were divided until each player had won six. Flashing a rally that surprised his opponent Ingraham won the set by taking the next two games. He allowed Emerson only a single point in the thirteenth game and won the fourteenth at love. In the doubles, Bates and Bettens, University of California, won both the best contested games of the their second and third-round matches. Only two other doubles matches were played yesterday, the victors being Neer and Davies, Leland Stanford, and Williams and Jones, Yale. The sum-

Boston 3, Washington 1. New York 4, Philadelphia 2. St. Louis 6, Detroit 2. Chicago vs. Cleveland (postponed), GAMES TODAL Boston at Washington. Philadelphia at New York. Detroit at St. Louis. Chicago at Cleveland.

WASHINGTON, June 28-In one of at League Park, Boston defeated Washington today, 3 to 1. J. T. Zachary opposed H. J. Ehmke and, in point of total hits, the Washington pitcher held total hits, the washington pitcher held his own, but Zachary was more wild than his Red Sox rival, giving a base on balls to the first man to face him in five of the first six innings. Hits by Joseph Harris and Howard Shanks, with two men on bases as a result of passes, decided the outcome in the ninth. The score: passes, decided the ninth. The score:

Batteries—Ehmke and Walters; Zachary and Ruel. Umpires—Hildebrand and Din-neen. Time—2h. 8m.

SHOCKER'S ELEVENTH VICTORY ST. LOUIS, June 28—St. Louis, with U. J. Shocker pitching, easily had the better of Detroit today, 6 to 2. The Browns knocked S, W. Johnson out of the box in the fourth inning, when they scored five runs. It was Shocker's eleventh victory of the season. The St. Louis star let his opponents down with seven hits. The score: Innings— 1 2 3 4 5 6 7 8 9 R H E

Syracuse 9m. 50s.	
Cornell	

POUGHKEEPSIE, N. Y., June 29 (AP)

-The seat of the Nation's rowing championship, through the efforts of a gallant crew that pulled purple and gold-tipped sweeps to victory yester-day in the Intercollegiate Rowing Asation's twenty-sixth regatta on the Hudson River, is moved from Annapolis on the east coast, to Seattle on

University of Washington eight A University of Washington eight defeated a previously unbeaten United States Naval Academy outfit, cham-pions in 1921 and again in 1922, and four other crews of the east in a three-mile pull down a picturesque course and for the first time in re-gatta history rowing supremacy of gatta history rowing supremacy of the colleges lies west of the Missis-

This was Washington's fourth attempt to carry off the blue ribbon event. The Purple and Gold oarsmen finished third in 1913, fifth the next year, and returned again last year to force the Navy to a new course record

Washington's victory, marked by one of the grittlest exhibitions in regatta history, ended the two-year regime of the naval academy, whose eight this season, in the opinion of rowing critics, failed to measure up to the standard of the victorious crews of 1921 and 1922.

The Middies employed a different sort of strategy this year; but it failed to offset the power of Washington's stalwarts. Instead of setting the pace from the start as its predecessor had done for two years, the Navy per-mitted first Columbia and then Washington to set a pace, holding their drive in reserve for the last mile. The Middles challenged, just as they had planned, and closed part of the gap that separated them from the smoothrowing westerners as they entered the stretch; but Washington's stamina was sufficient to match that spurt.

Columbia's fast early pace proved their undoing and they never were dangerous after the two-mile mark barely lasting to nose out Syracuse even terms, with Navy third and Cornell and Syracuse fighting for for third place. Cornell and Pennsylvania never were factors.

Washington came very near to making it a double victory, their freshman eight losing by less than a foot to Cornell in a finish that will be remembered among the most thrilling in regatta annals. For the first half of the race all five entrants in the first-year event staged a pretty struggle, but over the last half it was a duel between east and west, with the east triumphant by a fourth position, with Pennsylvania two lengths behind. At the two-mile mark Washington led by a full length with Columbia second, barely a quarter length ahead of Navy. Syracuse and Cornell were fighting hard for fourth position, with Pennsylvania two lengths behind. At the two-mile mark Washington led by a full length with Columbia second, barely a quarter length ahead of Navy. Syracuse and Cornell were fighting four lengths at the two-and-a-half-mile mark Washington led by a full length with Columbia second, barely a quarter length ahead of Navy. Syracuse and cornel were fighting four lengths at the two-and-a-half-mile mark Washington led by a full length with Columbia second, barely a quarter length ahead of Navy. Syracuse and cornel were fighting hard for fourth position, with Pennsylvania two fourth position, with Pennsylvania two lengths behind. At the two-mile mark west, with the east triumphant by a still fighting for fourth, and Pennsylmargin so close that judges at the vania last. As they entered the last

retw rowed as follows:

23 years of regatta history,
Junior varsity honors went to Syracuse University, which scored decisively over three rival crews. Cornell finished a length behind and had a similar adavantage over Columbia,

was elected captain of the Syracuse

Crew rowed as follows:

Washington Varsity Eight—P. M. Tidmarsh, bow; Max Luft, No. 2; Charles Dunn, No. 3; R. G. France, No. 4; F. W. Dunton, No. 5; Capt. Samuel, Shaw, No. 6; H. J. Dutton, No. 7; D. O. Walling, stroke; D. J. Grant, coxswain.

M. A. Wise '24 of Lacona, N. Y., was elected captain of the Syracuse while University of Pennsylvania crews for next year at a meeting of trailed two lengths further behind.

occasioned by a slight rain and choppy water the junior varsity eight-oared crews were off in smooth water at N. Y., bow oar on the varsity eight, was The start was very fine with elected Columbia captain for 1924. Cornell a shade advantage. In the E. J. Shanklin '24 of Lexington, Ky., first few hundred yards Cornell and was elected captain of the Naval Syracuse seemed to draw away Academy's crew for next year, and H. slightly, with Pennsylvania third and A. Medholt. '24 of Philadelphia, who Columbia fourth. Nearing the half rowed No. 4 in Pennsylvania's junior Syracuse seemed to have a slight lead. varsity shell, was elected Quaker cap-Approaching the mile mark Syracuse led by a length with Columbia second, Cornell third and Pennsylvania last The three last crews were almost even. At the mile Syracuse was a length ahead with Cornell and Columbia on even terms one length ahead of Pennsylvania. Cornell and Colum bia pressed close on the leading Syracuse boat over the last half mile, but nearing the line Syracuse increased its stroke and spurted ahead winning by a length. The other boats finished in the order named. The winning crew rowed as follows:

tain for 1924.

Large Entry List for

U. S. Open Golf Play

States open golf championship tournament, to be held July 9 at

New York, June 29

Inward, L. I., were announced to be \$50 last night. The list was closed

the day before. Among the well-known professionals entered are

Eugene Sarazen, W. C. Hagen, J. H. Kirkwood, J. M. Barnes and Jock

In the amateur class are included

title holder; F. D. Onimet, Charles

Evans Jr., R. T. Jones Jr. and R. E.

Sweetser, present amateur

CIK-UPS

HE New York Nationals have ac-

Syracuse Junior Varsity Fight—J. E. Gliday, bow; R. H. Rogers, No. 2; C. C. Olsen, No. 3; S. Stratton, No. 4; N. D. Lapham Jr., No. 5; M. C. Merrill, No. 6 E. T. Donahue, No. 7; C. V. Balten sperger, stroke; P. W. Ward, coxswain.

Although Washington seemed to get a slight jump on the other crews in the first start for the freshman eightoared race, the second on the day's regatta program, something happened in their shell in the first half-dozen strokes that caused their captain to call for a fresh start. On the second start, Pennsylvania got away slightly in the lead, with Cornell, Syracuse, Columbia and Washington in order named. As they neared the half-mile mark, Syracuse was leading, with Cor-nell, Pennsylvania and Washington nearly even, slightly behind the Orquired a couple of likely looking college prospects in W. M. Huntzinger, formerly of the University of Pennsylvania, and J. L. Leete of Amherst College. Both are pitchers. The new men will probably not be pressed into active service until September, when the player limit expires. hind. Approaching the bridge, Colum-bia and Pennsylvania were on even terms, with Washington and Cornell only feet behind and Syracuse less than half a length away. Passing the into active service until September, mlle mark, Corneil led by a few feet, when the player limit expires.

Even in the minors a team must have the pitching to win consistently, for fighting for fourth position. Nearing the mile and a half mark Washington

League the Britol Club's entire infield and a half mark Washington the mile and a half mark Washington drew up on Cornell, the other three crews continuing on almost even terms, a length behind the two leaders. The two leaders raced side by side from that point to within about 15 yards of the finish, when Cornell put up a brilliant spurt and won by inches the mile and a half mark Washington drew up on Cornell, the other three crews continuing on almost even terms, a length behind the two leaders.

J. F. Fournier's home run in the first inning of the Brooklyn-Philadelphia for the Connecticut women's singles championship, in the final round grades and outfleth as the first inning of the Brooklyn-Philadelphia for the Connecticut women's singles championship, 4—6, 6—2, 8—6. In the last set, Miss Macdonald four times came within a point of winning.

Italian Challenges U.S. to Three Races

Would Compète at Detroit-Hydroplane Racing Is Keen

from Washington. Syracuse finished third, a length behind the leaders; Pennsylvania was fourth, and Columbia fifth. The winning crew rowed as follows:

Cornell Freshman Eight—C. Russell 2d, bow; R. C. S. Sutliff. No. 2; E. L. Anderson, No. 3; J. A. Schaeffler, No. 4; S. T. Buckman, No. 5; E. W. Drett. No. 6; R. V. Lange, No. 7; E. H. Emm. S. stroke; R. Aronson, coxswain.

With a barely percepts, drizzle falling, the varsity crews vent into

Bagliette I, Winner of Prize at International Sporting Club, Monaco position for the start of the big race. Brussels, Belgium, at the end of Sep-There was a light choppiness of the tember, last year. At the motor boat surface which was rippled just enough to disturb the usually placid waters of the middle Hudson. A gentle southeast wind put the contenders under an and Italy—raced together for the first time and proved such a success that east wind put the contenders under an equal disadvantage, but they were off time and proved such a success that at 6:38, after two false starts. Nearing the first-mile mark it appeared as though Columbia had a slight advantage. though Columbia had a slight advantage with Syracuse second, Navy third, Cornell, Washington and Pennsylvania in order. At the mile, Columbia led by a length and a half, with Navy and Washington even Syracuse fourth, Cornell fifth and Pennsylvania last. Passing the mile Washington staged a spurt and came on nearly even terms with Columbia. Says that he has sent a formal challenge to Navy third and Cornell and Syracuse that he has sent a formal challenge to even, with Pennsylvania last. At the the Yachtsmen's Association of Amer-mile and a half it looks as though ica—the governing body of motor boat mile and a half it looks as though ica—the governing body of motor boat Washington had passed Columbia and racing in the United States—to run Navy had lapped the Morningside Heights boat. Approaching the bridge

Washington began to pull up on

Columbia until they were on nearly

three 50-mile races against any comer at Detroit, Mich., in September, this year. The only proviso is that the oylinder capacity of his opponent's engine may not be greater than that allowed by the class rule, 1500 cubic centimeters or 31½ cubic inches (about) capacity. If the challenge be taken up, the ensuing races will be an added attraction to the most allowed. added attraction to the meet planned will include the Gold Cup race and the 150-mile contest for the international sweepstakes. Since 1919 there has been a very

keen desire that motor boat racing relationships between European countries—especially England and America should become closer than they were. were divided upon the outcome, half mile the Navy in a great burst of tries were in agreement upon that Cornell gaining the verdict by a 2-to-1 speed pulled to even terms with Washington pulled ahead in the last 100 yards. The winning classes on American lines were crew rowed as follows:

Were in agreement upon the speed pulled to even terms with Washington pulled ahead in the last 100 yards. The winning classes on American lines were adopted by them shows how real their crew rowed as follows: desire was. It was not possible to adopt the popular American 151 cubic inch class because suitable motors are nowhere manufactured in Europe, but 1500 and 3000 cubic centimeters en-gines can be obtained in any country. These two classes therefore provide real opportunities for west and east After a delay of over 15 minutes race. He rowed at bow in the varsity with them, which will make for in to meet. Another factor in connection creased international competition, is their moderate first-cost equally moderate cost of upkeen.

Prices vary according to the country according to workmanship and finish, but a promising 1½ liter class hydroplane can be built complete for as little as £250 in England and 14,000 francs in France. Up to now the only real competition in motor-boat racing between Europe and America has been in the races for the British international trophy—once better known as the Harmsworth Cup—but it would nowadays cost at least £30,000 to build a 40-footer to contest this trophy with any chance of success. Not a few prominent motor boating men in England doubt whether their country will ever be able to send a challenger out to America to try and recover the trophy from the custody of the Motor Boat Club of America and think that, if the proposal now being cago entrant to reach the seminiar of the four who survived the second the built by subscription for a syndicate of yachtsmen does not come to fruition, the deed of gift will have to har altered to permit the trophy being the second for the seminiar of the four who survived the second round, and Miss Stirling is opposed to Miss Ada MacKenzie of Toronto, Canadian champion.

In defeating Mrs. Arnold Jackson and the seminiar of the four who survived the second round, and Miss Stirling is opposed to Miss Ada MacKenzie of Toronto, Canadian champion.

An acceptance of Signor Baglietto's challenge by America would be con-strued here as indicating an intention strued here as indicating an intention outward journey in a 39, reaching the to adopt the class in the United turn with a card of 2 up against her States, and would help the development of two proposals which are now being considered: the organization of 14 liter team races between British and American boats to be raced in the waters of either country alternately, no matter which won, and the establishment of a world's championship con'est for the class which is being planned to start next year. The cost of transporting the boats is a vitally important question in international racing and, in this respect, a small hydroplane class has a great advan-tage; a 11/2 liter racer fixed up for transport weighs only about 2000

HOTELS

CHICAGO

Make This a Real Vacation-Visit Chicago and

Chicago is the second city in this half of the globe; it's one of the most interesting in the whole world. Make this a vacation you will long remember. Come and see the wonderful sights and enjoy the myriad pleasures of this great summer playground. If you would spend your hours for recreation in delightful comfort amid beautiful surroundings stay at THE DRAKE.

Famous among the hotels of two continents, THE DRAKE is unusual in beauty of location and accessibility to the sports of a great watering place, yet it is within easy walking distance of the heart of Chicago's business, shopping and theatre center. On two sides its countless windows overlook bridle paths and a great bathing beach. Then there is the vista down Michigan Avenue, an impressive sight even in this city of extraordinary views.

Spacious halls and cool, airy rooms add the final touch to the joy of a summer sojourn at THE DRAKE. Although rates at THE DRAKE are moderate, special discounts of 10% to 20%, depending on the extent of visit, will be extended to visitors during July and August. Every room with bath. Early reservations suggested

Write for booklet, Edition "CSM," containing diagrams of all the leading theatres in Chicago

THE DRAKE is under THE BLACKSTONE management, which is the world's standard of hotel service. The two hotels are on Michigan Avenue, only a short distance

FORTUNE OF DRAW IN THEIR FAVOR

Miss Collett and Miss Stirling Do Not Meet in the Semifinal

BUFFALO, N. Y., June 29-With the fortune of the draw in their fayor, avoiding a meeting in the semifinal round this afternoon Miss Glenna Col-lett of Providence, member of the R. I. Country Club and U. S. woman's golf titleholder, and Miss A. W. Stir-ling of New York, Metropolitan champion and former national champion, were favorites today to tee off in the final round of the women's invitation tournament of the Buffalo Country Club course.
Miss Collett this afternoon is paired

yesterday Miss Stirling met with her stiffest opposition in the tournament. The metropolitan champion did the opponent.

Coming in she faltered momentarily at the tenth, wood and irons failing to work with the precision that had marked her previous play. She steadied, however, and the match was won on the eleventh hole.

Miss Collett's defeat of Miss Doro-

thy Higbie of Chicago developed only medicire play, the national champion and the match carried only three more holes. The summary:

Miss A. W. Stirling, New York, defeated Mrs. Arnold Jackson, Greenwich, Conn., 4 and 3.

Miss Ada Mackenzie, Toronto, defeated Mrs. Meivin Jones, Chicago, 3 and 1.

Miss Anita Lihme, Chicago, defeated Mrs. F. C. Letts Jr., Chicago, 1 up (20 holes).

Miss Glenna Collett. Providence. defeated Miss Dorothy Higble, Chicago, 6 and 5.

A City, Contemporary With Rome, Found Beneath a Ceylon Jungle

THE buried cities of Ceylon, the most fully excavated to date is Anuradhapura. Not that excavation can be said to be at all complete, but at the present stage startling facts are revealed.

Here was an ancient city, a contemporary of Rome, which for extent quite dwarfs it. "Road-centering Rome" was builded on seven small hills—Anuradhapura's splendid structures cover an area at least 16 miles square. At least—for neither the outer city walls nor its exact boundaries have as yet been determined. Decipherable "Asoka" characters place its founding as a royal city at 437 B. C.; its desertion as such did not take place until late in the ninth century.

Twelve hundred years of puissance, of luxury of splendid architecture—

Twelve hundred years of puissance, of luxury of splendid architecture—

Twelve hundred years of puissance, of luxury of splendid architecture—

Table The present a feature the most casual visitor cannot fail to find impressive. And remember, they are hand hewn, man handled monoliths; though much smaller than those used by the Egyptians. The "Brasen Palace" (erected about 160 B. C.) had 1600 pillars supporting the second story.

The structures so made appear to have been mainly for two uses—as monasteries and their adjuncts, and as precincts of royalty. Indeed, it seems as if the wide range of Anuradhapura had been given over to the highly active, recently introduced Buddhism as a sort of spirifual exposition ground, a national Acropolis and Chautauqua together, in the glory and learning of which royalty, semi-defield, had a natural place.

Huge Dagobas

Twelve hundred years of pulssance, of luxury, of splendid architecture and yet the western world knows of it nothing. Attacked by the jungle the moment the nightfires of civilization flickered out, like the vast ruins of Astec culture in Yucatan, its part is as legendary, its wonders as mythical as Ilium, Troy, or pent-up Utica.

The Valley Today Today one walks through the valley of Anuradhapura as though through a fine old English wood. Pastured cattle keep a lawnlike floor beneath stalwart live oaks, banyans, teak and ficus trees. Monkeys, parrots and end-less sorts of smaller feathered jewels pass forever above you. Clinging rat-tan, air-ferns, orchids, draping far aloft yield only a dusky half-light along the pathways.

Throughout the 256 square miles of this parklike domain, now interspersed with marble bathing pools,
now overtowered by soaring dagobas,
stand—and also lie—unnumbered
thousands of square stone columns,
unique to that far-off period of Cey-The characteristic feature of Indian architecture is obviously massy pillar (varving in cross section rises) crowdedly, profusely carved with a minute attention to detail. Of Egyptian, the lintel, the lotus column and the colossal half relief figure. Of Greek, the four "classic," columns and the lofty pediupward piled stories, progressively remaining stones. cessive to the top. Of Japanese the One of the mo cessive to the top. Of Japanese the wooden building in modified Chinese

Huge Dagobas The royal establishment had many elaborate bathing "tanks" (a Sanscrit word) round-about, and there were many others of a ritual nature scattered throughout the city. These un-canopied, al fresco, some of them yet holding water, have been excava by scores, their ancient splendor easily discernible. Another of the particular features of this vanished civilization, of this buried metropolis, is a half-dozen sky-scraping dagobas. Four are of tremendous size; the Abhayagiriya having a height of probably 280 feet and a base diameter of 252 feet. A dagoba is a memorial structure (solid usually, occasionally also a reliquary) inspired somehow by Buddhism; is generally conical, and is found of a characteristic type in each country— becoming the well-known pagoda in

China and Japan. The Abhayagiriya dagoba around which spreads a pavement eight acres in area, has been calculated by an au-thority as requiring bricks sufficient "to have built a wall 10 feet high from London to Edinburgh.

The "moonstone" of Ceylon is not a "precious stone"—until its quaint carving has made it so. These socalled moonstones are of granite, serving as the ground step at the bottom of a flight of stairs. They are semicircular with a flat side from three to six feet long, carved in concentric perfect columns and the lofty pediment. Of Arabic, the "Moorish" arch, dome and minaret. Of Chinese, curving roofs, ornamental roof-trees, and hapura has several of Ceylon's few re-

are everywhere here. Springing from the centuries to Budda Gautama him-wide marble platforms, or embedded self; to consider what this one tree in the soil; once supporting canopies has meant to aspiring humanity.

The Yiddish Press in America

within the last four decades. Using an alien language that for centuries was despised and called a jargon, pride in their medium but regarded News. read by a public unused to newsfor a long time utterly uninterested in news, this Yiddish press has nevertheless so forged ahead that today it has become one of the potent agencies making for a newer and better America.

Yiddish as a language has its origins in the fourteenth and fifteenth centuries, when the Jews migrating from Germany to Poland took with them their middle high German speech. As a literature it has almost its begin-ning in the middle of the last century, when of a sudden Jews began to see how poignantly the woes of the Pale how poignantly the woes of the Pale licists were forever trying to thrust could be expressed in the queer language that had developed there. As a press it is hardly more than half a simple readers, and they were constituted by the state of century old, and most of those years stantly indulging in erudite German it has seen in the United States. Directory began to register the num-Yiddish periodicals in the United States, and then it could mention only six. In 1922 there were 41! Beginning with a modest hand distribution in the 80's, the circulation has increased until now it is well over 1.000,000. Robert E. Parks who is probably the authority on the immigrant newspapers, has said that

perfect press in America today. Difficulties at the Start

the United States were little more was collected to start a new Yiddish than German papers printed in newspaper to be called the Forward. Hebrew characters. They failed to Like the rest, however, it languished flourish largely because they truckled to a public without loyalty to the mamme loshon, the "mother tongue." It was a distinctly con-servative public and was largely of three strata: Old World pietists who, although they spoke in Yid-dish, thought and read in Hebrew; New World "alrightniks," climbing cloak-and-suit manufacturers who, although they thought in Yiddish, tried to speak and read in English; and no-world plodders, patient treadlers and pressers who, although they knew no language other than Yiddish, read not even that. A Yiddish press among such folk was, of course doomed, and those old-school writers who were swept over with the first tides of the exodus soon found themselves distressingly superfluous in the

new country. It was not until a profound unrest manifested itself in America, and manifested itself in America, and a less docile and contented public arose, that Yiddish began to flourish as a written language. Not until the 80's, when the industrial disaffection

That in itself is not like Londoners. But these early workers have a fellow-feeling, they are akin to the others who have been called by an alarm clock. They are with the people who live the same kind of lives as they do. They share a sense of possession too. London seems to "belong" to the only people who are awake, even as the train runs for them. Sheep in the Street

The Friendly London

of the Early Morning

Sheep in the Street

Sheep were being driven down Kingsway, a sheep-dog barking at their heels; there was no roar of traffic to drown the song of birds. The Strand was clear of omnibuses, and a real country smell was watted down Southampton Street from Covent Garden Market. Everyone was awake there, busy and cheerful. Mingling with the Londoners were the rosy-cheeked growers from the country. There was a bloom on the asparagus, and the cucumbers were very green and stiff. A hum of conversation came from "Pea-shelling Alley" where 20 women were shelling peas at greatest speed for the hotels. A veritable

est speed for the hotels. A veritable carpet of pods was at their feet.

The flower market had overflowed into the street, the beauty of the blossoms contrasting strangely with the shabby people who handled them. But the real shawl women were there, carrying masses of flowers, in their arms or their aprons. Bundles of grasses brought memories of the fields, but the rest of the market resembled a flower show. Masses of pink and blue hydrangeas filled one corner, red and pink geraniums an-other, huge bunches of red peonies caught the eye, delicate lilies lay in

The great daily cleaning of London was in progress in the Strand. But it was a homely business. A cleaner who had finished, was brushing his own boots.

Architecture Revealed

It was the time to see the architecture of London. No traffic inter-rupted the view of St. Paul's. The dome rose in a misty sunniness, and clean-swept Ludgate Hill seemed a fitting approach to it. Through a knew window on the south side the sun Mrs. threw the reflection of a colored winnothing of the Marchioness. Mrs. Asquith was there during the long dow on the other side, in a golden glow. St. Paul stood high on his colyears of her husband's premiership, glow. St. Paul stood high on his col-and provided some of the liveliest umn in the sunshine with no quickly passing omnibus to cut the vision of him suddenly in two. Even the army Mrs. Lloyd George and Megan, while they were in residence, did a great of postmen, with letter bags on their deal to make the dreary old house more comfortable and homelike.

Megan made the place merry with the litter bags on their backs, pouring forth from the general post office, was picturesque.

It was a London without hurry.

Megan made the place merry with the It was a London without hur presence of her girl friends; Mrs. People seemed to be "putting-in" tir Lloyd George delighted to welcome her husband's friends, especially those in a shop window in Fleet Street, and who came to sing Welsh hymns with him on Sunday evenings.

What will Mrs. Baldwin do in No. 10? It is said she is rather doubtful the city with cheap workmen's tickets, at the thought of the regal red carpet waited in All Hallows' Church until on the white wood staircase. There was a red stair carpet at No. 11, and she had it dyed dark green, and she may take in hand the red carpet of No. 10 also. But there will be

May take in hand the red carpet of Police No. 10 also. But there will be no worry about anything. "I always Station began to pour out the better take my fences as I come to them," she says. And in that calm confidence dresses, young men with flowers in

AMERICAN CLUB

Over House of 'Sir Edgar Speyer in Mayfair

Special from Monitor Burcon.

LONDON, June 14—Since its inception in 1916 the American Women's Club has proved so successful it finds its present premises altogether too small for its membership and inadequate for its many activities. It has therefore, entered into an arrangement to take over the house belonging to Sir Edgar Speyer, 46 Grosvenor Street, Mayfair. At present, and until the new premises are rendy, the club is housed at 41 Hereford Street, Park Lane.

Objects of the Club

Here a representative of The Christian Science Monitor interviewed the president on the objects and activities of the American Women's Club in Great Britain and Europe, and the bringing together of women engaged in Herery, artistic, and philanthropic pursuits.

The Society of American Women in London was founded in 1899, its membership being confined to those whose father or mother was of American engagement of the common of the commission are senatorial commi

bership being confined to those whose father or mother was of American birth and an American citizen, or those who, if of foreign parentage, were born in America and lived there until the age of 21; but honorary members admitted, if distinguished per The main objects of the so ciety and club are obtained by and their activities expressed in what are termed a study circle, and a current events circle, meetings of which are regularly held at the club. At these reunions, members or distinguished visitors give addresses, readings, or recitals, or open discussions on matters of English, American, or Euro-

A typical meeting of the study circle as that when Sir Charles Wakefield. who lately went to the United States on behalf of the Sulgrave Institution, to present memorial statues to certain American cities, told the club about his American visit.

Provision for Students

A somewhat unusual and charming feature of the club is the admission, at specially low rates, of young American women studying art, music, literature and the drama. Further, there is a junior membership for unmarried

elatives of members.
With regard to the new club premises Mrs. Curtis Brown said that Sir Edgar Speyer's house was a wonderacquisition and would provide fitting center for the club's work. decorated and furnished, they would have in it one of the most beautiful clubhouses in London. In addition to all the usual club rooms, library, offices etc, the new house will contain 25 bedrooms for the ac-commodation of members wishing to live in the club, and for visitors from the United States. One of the chief objects of the club is, besides providing a social center for American no wise contemplates a propaganda women in London, to keep them in either at home or abroad for "bl touch with the homeland. Thus, members of women's clubs in the States are allowed temporary mem- to-1 business" in the conference. He

On the contrary the provincial magnate visiting London is usually disposed to remain there not a moment. posed to remain there not a moment longer than his business compels him. the merits of the provinces and the polis he is ready to denounce all capital cities as mere haunts of idleness and pleasure or the refuge of

Approached at night, through its network of outskirts, the first impressions of Birmingham will not readily be forgotten. On either side of the railway loom roofs and chimney stacks belching smoke into the sky, while now and then a furnace shoots crimson breath into the blackness which seems more dense by contrast. They are the steel, iron, and chemical sleepless watchers over the city, and here already is the keystone of Birmingham, its people and their lives. Seen in the daylight, these vast straggling suburbs lose much of their awe-inspiring dignity. They are gray with an unrelieved grayness, and sordid, with waste patches here and there beneath the shadow of grim

people and country-folk or Londoners.

They have not the shrewd witticism and crowding for a more prominent or humor of the cockney, nor are they so smooth-tongued and pleasant as the chance, even the chance of their city.

BIRMINGHAM; June 16 (Special der that great stress is laid upon gen-

doner is prone to observe that "It is hetter to be a lamp post in the Strand certainly a matter for sincere con-gratulation, and Americans will doubtlessly associate it with the production of John Drinkwater's "Abraham Lincoln," and Rutland Boughton's "Immortal Hour." The first sight, how-ever, of the rather insignificant building squeezed up between shops in a tram-laden back street is semething

quality, strongest, perhaps, in its Pre-Raphaelite representatives, Burne-

so smooth-tongued and pleasant as the southerner, though often more reliable.

In this little world of self-made men they have built a university, and the great fan-shaped building of red brick with gray rounded domes stands up in a setting of carnfells on them; they will show royalty that suburbs. The tall-clock towar can be seen for miles. This university sends the great symbol of hope for the generations growing and those yet to come. Since the university draws a great proportion of its students from the secondary schools, it is small won-

Voice of Congress Sought

As far as United States producers are concerned—Nevada, Utah, Montana and Idaho are the great silver statesthey frankly aspire to a more closely knit organization at Washington. They want to be able to make the voice of the industry felt in Congress as the farmers do. They believe that for The corporation exports from Russia them, as for others, there is strength clothing, hardware, glass and sugar, only in union. The one recent piece of getting in exchange cotton, skins, furs, hides and licorice root. Most of silver legislation, the Pittman Act, was the trade is now carried on by money,

most as much as Europe and Asia combined. It is because of this overwhelming American predominance in the silver industry that it is desired to make ver industry that it is desired to make New York, instead of London, the center where prices are fixed.

London since time immemorial has regulated the silver market with autobe the chairman of the Senate committee on mines and mining in the Eighth Congress. Senator Oddie intends advocating the establishment of a department of mines as a Cabinet office, declaring that the mining industry is entitled to such_recognition because of its paramount portance to American national welfare.

MARRIAGE MUST NOT **BAR RIGHT TO WORK**

Feminists in Britain and America Contend That Sex and Wedlock Should Not Be Regarded

Special from Monitor Bureau LONDON. June 8-Mrs. Oliver Strachey, editor of the Woman's Leader, the organ of the National Union of Societies for Equal Citizenship, and a prominent British femin-

Women Facing Same Problems

Women Facing Same Problems

Everywhere I found American women faced with the same problems as British women are up against. Equal pay and opportunities between the sexes is by no means an accomplished fact in any department of life, except perhaps in the civil service. American women are experiencing the same disappointment over their blanket amendment as we in this country over our Sex Disqualification (Removal) Act. Both measures promised that sex and marriage should build no barriers in public life, and both have proved failures when put to the test.

test.

The question of married women's em-The question of married women's employment, however, is not nearly so acute in America as over here, partly because that country just now is on the crest of a prosperity wave, and so there is practically no unemployment anywhere. There are numbers of married women in the American labor married women in the American labor married to the all though a married women through through the years. sible for associating poets with garrets. Of its musical reputation, too, the city is not a little proud.

In further support of this artistic strain in its citizens Birmingham boasts also an Art Gallery of no many quality, strongest

Personally I do not believe that un-mployment will ever be satisfactorily ettled by legislation, since methods of

quality, strongest, perhaps, in its PreRaphaelite representatives, BurneJones, Rossetti, Ford Madox Brown and Holman Hunt.

Beyond the difficulty of the laborious and ill-connected transport of Birmingham, which somewhat dismays the "lamp-post" from the Strand or Fifth Avenue, when he finds himself confronted with nothing more rapid than trams, there is the difficulty of spending his leisure evenings. The outlets are few indeed for the stranger who, having finished a day's business, is thrown upon the city's country that American women do not

buildings. The people in the streets business, is thrown upon the city's move slowly but with a doggedness, and their faces bear the stamp of toil. Making one's way by the main thoroughfares toward the center of the town, a stranger must be struck at once by the difference between these once by the difference between these people and country-folk or Londoners. They have proposely avoiding streets are packed with swaying humanity, each unit of which is pressing moted a number of reforms. Personally, however, I think it is much to be rehowever, I think it is much to be re-gretted that they do not seek election in the same way the men do. At pres-ent there are two women in the lower

RUSSIAN TRADE ENTICES CAPITAL

Barter as Method of Trading Falls Into Disuse While Banks Are Again Being Established

MOSCOW, June 1 (Special Corre-pondence) Since the abandonmen

and industry. One now finds many stock companies, organized for trading purposes with joint participation by state and private capital. A description of one of these companies may give an idea of the basis on which much of Russia's internal business is being done.

The Russian-Bokharan Trading Corporation was organized a few months ago, with a capital of 1,000,000 gold rubles. Five thousand shares were issued of 200 rubles each held in equal quantities by the Russian Government, the Bokharan Government and a group of private capitalists. The corporation carries on its business quite free from state interference, the Government, through terference, the Government, through directors, merely checking up on its work at the end of each year. Ordinary Business Methods

The corporation follows ordinary business lines, buying as cheaply and selling as dearly as market conditions permit. So far it has been chiefly occupied in exchanging the manufac-tured products of Russia for the raw materials of Central Asia. It sends its representatives into the remote Mexico, the United States and Canada, in the order named, mine the
lion's share, which exceeds 150,000,000
ounces. Central and South America
between them, with an output of
roundly 16,000,000 ounces, produce alsoundly 16,000,000 ounces, produce alSenatod Oddie is a practical silver

Russla in response to the expandin Russia in response to the expanding needs of the country's reviving

trade and industry. The corporation is also interested in foreign trade. It has already col-lected for export over 300,000 pounds of licorice root, which are stored in Petrograd. It operates, of course, under the Russian laws, securing export licenses from the Commissariat for Foreign Trade. In its dealings with outside firms it can be represented either by the foreign trade delegations of the Soviet Government or

by its own agents.

The commercial director of the company emphasized its need of new capital for further developments and the favorable possibilities which American investors might find in the enterprise. He said:

More Business Expected

Our present capital is sufficient for our first year's operations. Our experiences so far have been favorable, and we expect to show a profitable balance sheet at the end of the year. But we look forward to a great development of our business in the future. Central Asia leaf, and the state of the property of the state of the property of the state of the is a mine of unused raw materials, and there are infinite possibilities of trade is a mine of unused raw materials, and there are infinite possibilities of trade expansion there. Then, during the years of civil war and general unsettlement, there was very little hunting or trapping in Central Asia. The result is that the wilder districts are simply overrun with animals, which sometimes are a gest and even a menace to the neityes. ist, who contested the Chiswick and Brentford division at the last two general elections, has recently returned from a visit to relatives in the pest and even a menace to the natives. United States. She told a representative of The Christian Science

IMPETUS GIVEN MOVEMENT FOR PROHIBITION IN EGYPT

Enactment of Legislation by Angora Government Spurs On Temperance Workers Elsewhere

CAIRO, May 27 (Special Correspondence)—The temperance movesty called on the Prime Minister and ment in Egypt is of very recent submitted a memorandum urging on growth. In a country where not the Government the prohibition of the merely temperance, but complete ab-stinence, has been general among the liquors, on the same lines as the indigenous population for centuries, United States prohibition legislation. there has been neither need nor scope The Premier, while showing much there has been neither need nor scope for prohibitionist activities. The reward William Lane, after a five years' residence in Egypt, during which he had lived as a native, among the natives, recorded in 1835 that he had never seen an Egyptian in a state of intoxication.

This fortunate state of affairs unhappily no longer exists. The rapid opening up of the country to European penetration during the last 50 years has introduced with European civilization and education, European civilization and education, European to the sale of strong drinks be issued. vices. A considerable percentage of the upper classes now takes alcohol in some form or other, and in the lower ranks of society, also, drinking habits are becoming increasingly com-

To combat the evil, which by responsible Moslems is doubly deplored as being at the same time a danger to the national character and an offense against religious law, the Egyptian Temperance Society was formed some years ago. The society was fortunate in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the society was fortunated in securing as its president of the securing as its presid in securing as its president Prince Omar Pasha Toussoun, one of the wealthiest and most influential members of the Egyptian Royal Family.

sympathy for the aims put forward in ligion of Islam forbids the use of the memorandum, expressed doubt intoxicating liquors, and not the Egyptian Moslems alone, but the Egyptian Government could take the Copts also, have shunned alcohol. Eddardic action which the society recdrastic action which the society recommended. At the same time he promised to take some immediate useful steps to lessen as far as possible the dangers of the drink traffic under present conditions.

The sequel to the delegation's visit has now appeared in the form of a circular issued by the Ministry of the Interior to the departments confor the sale of strong drinks be issued. The society is not resting on its laurels. but is carrying on an active pro-paganda for the realization of its hope of securing the total abolition of the sale of alcoholic liquors in Egypt. The recent prohibition enactment of the Angora Government has given a great impetus to the movement here.

HOUSEHOLD PAGE

AT MENTION of the word "slip includes the pleats or gathered ruffle covers" come memories of the parfors of our grandmothers and has parfors of our grandmothers and has provided and a half of the floor. The ruffle, or call the breathless awe with which we were warned not to touch, became a mysterious mound of which we were warned not to touch, became a mysterious mound of which we were warned not to touch, became a mysterious mound of which we were warned not to touch, became a mysterious mound of which we were warned not to touch, itself in stoll of chagrin behind cannopy of covers. All semblance of the confrort and cheer we had known in the winter disappeared, and we fled quickly out of the house twice the confrort and cheer we had known in the winter disappeared, and we fled quickly out of the house twice the confront and cheer we had known in the winter disappeared, and we fled quickly out of the house twice the confrort and cheer we had known in the winter disappeared, and we fled quickly out of the house twice the part of the confrort and cheer we had known in the winter disappeared, and we fled quickly out of the house twice the please or gathered ruffle cover the seat frame, either cut laid in their box, to all intents and purposes new.

This exquisite, hand work is done by France girls trained in France and brought to the United States by special arrangement. With the United States be left open over each leg and brought to the United States and brought to the United States be left on the confront disable with a tasset of the confront disable with the United States of the confront disable with the United States of the confront disable with a tasset of the confront dis

Today we do not bury our furniture and decorations beneath such trappings. We rejoice in an array of color as refreshing and gay as our own summer frocks. Who has not known the charm of the winter house newly dressed for summer days, with its crisp organdie or cool, transparent silken draperies; its furnishings inviting and restful in their happy. fitting slip covers, and here and there the radiance of freshly plucked garden

The modern slip cover is above all else practical, in that it protects the winter silks and velours from dust and the ravages of the summer sun, but it has a distinct advantage over the old type of cover, because it contributes to the decorative scheme of things and transforms at little expense our

altogether delightful. Toiles de Jouy, plain or striped linens and gayly-flowered chintzes, mercerized repps and sunfast materials offer a great variety to the housewife who wishes to make her

winter home into something new and

own slip covers. If covering all the furniture in a room, however, it is not wise to cononeself entirely to flowered or figured fabrics. An occasional chair covered with plain material gives a pleasing and restful contrast.

How to Make Slip Covers

The successful slip cover must, first of all, fit well; otherwise it soon becomes misshapen and dowdy. The making of slip covers bears much the tailoring of a suit does to milady's Not only must it be cut correctly, but care must be given to the details of fitting and finishing; the seams need to be stitched absolutely straight and the corners turned with precision. If flounces are terials. applied, they must hang straight and pleats be exactly the same width and evenly spaced to insure freedom from a dubious homemade look.

The surest way of arriving at accurate results is to lay the material washing silk in the gayest colors may on the furniture, fitting it as care- be chosen. This new tricot resembles somewhat a loosely woven crepe. A short coat goes with the skirt, and can be worn for golf if required. The costume illustrated is white silk, with the monogram embroidered in brown silk. The white straw hat is lined and

rimmed with brown velvet ribbon.
This season neat three-piece costumes are worn more than usual. If in tricot, they consist mostly of coat, skirt and jumper. The collar and cuffs of the coat may be finished with suede appliqued to the tricot by means of silk embroidery in which a silver or gold thread is introduced. Plain costumes show a pattern jumper of Fair Isle tricot. These are in a light wool with woven pattern; those in silk have the pattern carried same relation to decoration that the out in colored silks in machine embroidery. A white silk suit looks well with these jumpers, but for serious tennis all white is preferred by most players. The original Fair Isle jumper may be worn with a pleated skirt in one of the thin woolen ma-

How to Choose Cantaloupes

A good cantaloupe is usually rather small, or not more than medium size. Overgrown specimens and large varieties are seldom of good flavor. Heavy weight in proportion to size is desirable, for it indicates thick, firm flesh. The cantaloupe with a large cavity and thin flesh is usually insipid in taste. A rather dense netof the skin is one of the prime and almost positive proofs of good quality. Smooth-skinned cantaloupes are usually of inferior flavor. There are a few comparatively smooth varieties that are excellent as to taste, but within those varieties there is likely to be a large number of decidedly inferior melons. The netted melons are more uniform in size and quality, are not as likely at the ends, and are usually fifmer and thicker of flesh. As a rule, the deep-ridged melon is better than the one with shallow ridges.

Generally speaking, the green-fleshed melon is better than the melon with orange-colored flesh. To be sure, some varieties of the orange-colored are excellent, but they do not run uni-formly high in quality. Melone shaped like a football, or somewhat oblong in shape, are as a class superior to

those that are round. The last and most vital essential of good quality in a melon is a proper degree of ripeness. An overripe specimen is not palatable, and a green-skinned one lacks the desirable rich, almost a clear yellow-colored skin, whereas others are at their best when a faint yellow tinge is discerni-The early melons are better than the late ones, as the late ones often fail to mature properly because of a lack of nourishment. If the stem of a melon is dried, yet clinging to the melon, the fruit is not fit to eat. The vines often suffer from trampling of feet, frost, and other causes, and a The large number may die. That leaves the partly-developed melons to ripen without sufficient nourishment; then they are of course entirely lacking in richness and flavor.

Taking Care of Organdie

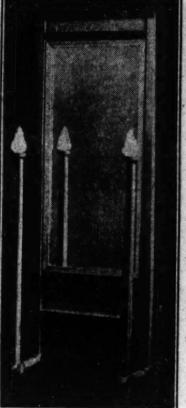

Organdie may be freshened by sponging lightly with water and press-When really soiled, wash in cold water, using either borax or salt in the rinse water. Either one gives plenty of stiffness. Much of the permanent-finish organdie, that stays stiff, often flies up, and even rolls up in the case of sash ends or panels. This be obviated by covering small weights with scraps of organdie and inserting them in the lower hems or points of unruly decorations.

LANDSCAPE ARCHITECT Designs of gardens, country estates, parks and playgrounds, institution grounds, golf courses. Correspondence invited.

In many cases panels of this beautiful wood are framed in the darker teak. I "I have my own home paneled in the teak lound in oak." and Mrs. Log.

In the Sitting Room Another piece of sitting-room furniture was a sideboard with pedestal cupboards on each side and a couple boards had sliding glass shelves which

come out for cleaning. There was also a very delightful bureau with abundant space inside for storing papers and a couple of long drawers below. long drawers for it to glide in and out with the greatest ease. The bureau has a good broad top, leaving plenty of room for jars of flowers or books. "I have always wanted to do some-In a delightful chest of drawers the thing," Mrs. Joel said. "My ambition frame was of dark teak, the drawers is to make furniture with some of Mr. Rowley's beautiful pictures in colored

woods let in as panels." Every piece of furniture, Mrs. Joel informed her visitor, is turned out un-

Storage for Vegetables

A small family often buys more vegetables than can be used at one meal. These, such as carrots or parsgin. The head and foot were the same height, so that when the bed stands against a wall it has the effect of a divan, a great advantage in these days of bed-sitting rooms.

The dressing table problem was these may even start to grow before the grown and the same that the same height, so that when the bed nips, or even celery, may be put in a shady place in the yard, buried just under the same height, so that when the bed in page 1. they are used up, but are suitable "When I started my cottage," said for soups and stews just the same. rs. Joel, "I had no proper dressing It is a simple matter to pull up one table and had to use a low occasional or more as needed and leave the rest.

Educational Leaders Teachers and Students Throughout the World

Thousands of the world's most thoughtful citizens are watching with keen interest the columns of THE CHRISTIAN SCIENCE MONITOR as they unfold the news-in extended and accurate account - of the National Education Association and World Conference now in session at Oakland and San Francisco.

Educational leaders, teachers and students have highly praised the Monitor's reports of previous educational conventions. Of that meeting held in Boston in 1922, Mr. Joy E. Morgan, Director of the N. E. A. Press Service, wrote:

"I want to express my personal appreciation of the work of the Monitor staff, of its fine spirit of service, and of its painstaking effort to get all the news possible and to report it fairly and accurately."

The Monitor has provided even more adequate service for reporting the great convention now in progress.. Not only at this time, but every day,

Education May Be Aided by Reading THE CHRISTIAN SCIENCE MONITOR

Its clean, constructive journalism and weekly pages devoted to every meritorious phase of public and private school activity -policy, method, administration, maintenance-can be of inestimable value to those engaged in teaching. The fact that hundreds of teachers make constant use of the Monitor in their class work indicates that this international daily publication fills a definite need in educational affairs.

THE CHRISTIAN SCIENCE MONITOR is helpful in the home, the office, the school room. Subscription rates are:

One Year, \$9.00 Six Months, \$4.50 Three Months, \$2.25 One Month, 75 cents Six Weeks' Trial Subscription, \$1.00

ness in the use of it in his poetry. 4 4 4

in the field of tragedy. The comic passages, in fact, are so inferior, that they have frequently been attributed to another hand. Herein we must recognize a distinct limitation. The poise and serenity of Shakespeare, the sense of proportion, are not to be found here. With his intense and very youthful seriousness there is no chance for humor; and hence it is that he is often in danger of exaggeration and hyperbole. But how much he has given us to company like, when ness, limitations!

One of the most significant things is the fact that this poet, mere youth though he was, living in an age de-lighting in material achievement, was none the less interested above all in the development of character. Ac-cording to him, each man was dominated by some one overpowering emo-In Tamburlaine, it is desire for worldly pomp and power, in Faustus, a restless yearning for all knowledge and experience, in the Jew of Malta (the prototype of Shylock) the insatiable greed for gold. But Marlowe is interested also in poetic questions. His "mighty line," referred to by the critics, must have taught the young Shakespeare many lessons in verification; there had been nothing like it in English verse before. The flowing and grace of Chaucer had found no followers in the succeeding age, and even that had nothing of the

ration and hyperbole. But how much he has given us to compensate for his Yet should there hever in their restless heads One thought, one grace, one wonder, at the least

> Never has poet more fully grasped the significance of that beauty, which Shelley terms "the desire of the moth for the star." We can picture the young Marlowe grappling with the idea, determined to put it into words, and then suddenly, in a flash of in-

> spiration, seeing the impossibility of it and writing these lines. The "Jew of Malta" is, perhaps, chiefly interesting as the prototype of Shakespeare's "Merchant of Venice," but Barabas is a very different character from Shylock. And Marlowe And Marlowe has succeeded in making us see the poetry even of the miser's life; Barabas is not actuated with mere greed;

sapphires, amethysts, spell for him all the wonder and romance of the Orient. "Edward II." the maturest of the plays, and the most camefully con-structed, shows us Marlowe beginning Gay with limp grass and leafery new to grow up. It does not suffer from the comparison with Shakespeare's "Richard II," which follows it closely in plan, though there are certain passages in the latter which would veal Shakespeare as the greater

4 But it is in "Dr. Faustus," Marlowe's rendering of the familiar old medieval legend, that the modern reader finds st absorbing interest. The struggle becomes for the reader merely an outward reproduction, for the childlike audience, of the thing that really held Marlowe's imagination—the struggle of a man with his own impulses, the conflicting desires which perhaps Marlowe himself was experiencing. No wonder that the conventional orthodox folk of his day were astounded. But for the modern writer what a marvelous and beautiful conception; what boundless powers of comprehension and sympathy were possessed by the man who was filled with pity Mephistopheles himself, who saw in him a struggling soul, longing for

A combination of Shelley and Keats, with dramatic power second to that of Shakespeare alone, and with an interest in character as intense as that of Browning, what reader of today can fail to find Christopher Marlows a figure of well-high irresistible ap-

Shakespeare's Garden in New York

The roses are blooming in Shakespeare's Garden in Central Park, and visitors flock through the little iron gate at the foot of the hill and

"This morning, what do you think?" deed, so much of the past has gone asks the gardener, with a broad Irish smile. "Three girls was comin' up through the roses, and I has to baw them out. And then what? 'Oh, go on onf,' says they. Yes. Just like that substituting from the best that has gone before is in a way a denial of contemporary character to our own times, or to any other period; for the quality of civilisure I expects anything from the boys.

Conversation

sharing of thoughts and beliefs; and behind words there must be some measure, however slight, of thought. Therefore, ordinarily, a person's conversation is a more or less complete index of his thoughts. Jesus said: "Out of the abundance of the heart eth forth good things." Surely words calling up pictures of calamity, disease, death, and filling thought with depression, discouragement, and fear, are evil things!

Listening to the scraps of conversation one may hear in any public place, equally true for all mankind. In that or even sometimes to that of himself light, does not our own speech take or his friends, one may well be concerned over the state of thinking so generally indicated. Familiar to most, and by many ignored is Dani's most, sessions of evil disturbance. ence to things true, honest, just, pure, lovely, given in Philippians, which he ends thus: "Think on these things." Mrs. Eddy, the Discoverer and Founder of Christian Science, says in "Miscellaneous Writings" (p. 346), "It is a rule in Christian Science never to repeat error unless it becomes requisite to bring out Truth." This bringing out of the truth is, in ordinary daily conversation, not often the reason for the multitudinous discussions of error on every side; and it is a rule that can not be too carefully heeded.

Sometimes so-called mortal mind tempts us to believe that we shall be dull and unattractive to our friends if we really obey that admonition of Paul's in Philippians. Obedience thereto will not result, however, in unintereting days or continual silence, although in much more silence, perhaps, than was habitual before. Is he really a friend who is interested only in the error we voice? Is that companionship worthy of the name which is founded on a mutual exchange of fears, symptoms, and idle gossip? Indeed, anyone may quickly prove by taking Paul's injunction literally, that thinking of good and helpful things, and talking only of those things, broaden, enrich, and elevate daily life, and make conversation an interesting exchange of intelligent ideas, attracting worth-while companionship

Christian Science goes farther than that, however. It teaches that only that which is good and helpful is real or God-made, and that one's body and environment are but pic- incalculably than we can ever know. tures of one's thoughts. With this the sin-weary thought of the world. teaching the Bible agrees, expressing it thus: "For as he thinketh in his heart, so is he." How vitally essential, then, it becomes to have one's thoughts such as one wishes externalized in human conditions!

As one commences the study of

of God, good, continually in the "Out of the abundance of the heart the mouth speaketh. A good man out of the good treasure of the heart bringeth forth good things." Surely words calling up pictures of calamity, disease,

and spiritualize thought?

If all this is important for oneself, it is so also for others. If what we hear is helpful or harmful, that must be equally true for all mankind. In that ease, are adding but so much woe to the sorrow and suffering of the world. There are few, indeed, who do not really wish to be helpful to their fellow-men in some way. Is there any more universally available way than that provided through right conversation? If everyone within reach of our spoken word during the day heard only that which was constructive, kind, cheerful, intelligent, even when oircumstances made impossible the ex-pression of that which might be spoken of as more definitely spiritual, should we not have helped by that much? And if, in our consciousness, there is trust in God, an earnest desire hourly to reflect His goodness, a selfless determination to express nothing unworthy of our high estate as the child of God. then our every word will go forth as a blessing, not a bane, lessening the world's experience of evil.

Although the apparent power to harm of continual fear-laden conversation is plain to the thinker, he learns, too, not to fear this seeming evil. It is only the uninstructed thought-that which through fear and ignorance accepts as real all it hears of calamity and disease which can seem to be hurt thereby. If unkind and fear-filled thoughts occasionally come to our mental doors, in spite of our best efforts, we do not need to express them. We can at least keep still about them. Eventually, we may be assured, our thinking, made clear and pure by the radiance of Truth's appearing, will voice itself in gracious, healing words, which will lift, more

THE CHRISTIAN SCIENCE MONITOR

"First the blade, then the ear, then the full grain in the ear"

BOSTON, FRIDAY, JUNE 29, 1923

EDITORIALS

A NEW bill of rights is being written by the states of the American Union south of the old Mason and

The New "Solid South" Dixon's line. It is in the form of a declaration of independence of political action and of freedom from the domination of that partisan faction which would pledge the Democrats of the south to a policy of repudiation and nullification. Southern

Democrats have made it plain that they will not support the plan of their northern brethren to reopen the prohibition question by dignifying it as a national party issue. They do not attempt to dictate to the party leaders in New York and in other states where measures have been adopted with the hope that the federal prohibition law may be nullified by flagrant violations. They seek only to serve timely notice that, so far as what is called the "solid south" is concerned, it is "solid" for the defense of the national honor.

One who has taken account of the growth of popular opinion in the southern states in the last quarter of a century need not be reminded that the soil there is not a profitable place in which to sow the seeds of anti-prohibition propaganda. The people there learned, much more quickly than did the people of the north, the lesson which finally made possible the outlawing of the saloon. Their Americanism was more readily asserted and manifested, perhaps, because their decision was not influenced by a great mass of unassimilated voters who had transferred their citizenship, but not their allegiance, from the countries of their origin across the seas.

Having made their decision, the people of the south announce their determination to abide by it. Such action would seem to render abortive any preconceived plan projected by Democrats in the north or east to commit their national party organization to a platform plank demanding modification of the existing enforcement code. The hope of the nullificationists, never well founded, is thus utterly destroyed. No Democratic candidate for the presidency has ever been elected without the aid of practically the solid vote of the southern states. It would be preposterous to claim now that there has been in the north a change in popular sentiment that would render this traditional adherence to the party's cause in the south unnecessary to success.

The timely declaration by the Democracy of the "old south" virtually assures a new alignment among those party leaders who have assumed the right to name the candidate and to define the issue. Thus forewarned, it would be inviting inglorious defeat for those who insist that prohibition enforcement is still an issue to persist in their determination to commit their party to a policy of nullification.

A CORRESPONDENT to The World of New York recently contributed a letter, which was run under the

A Nation of Нуроchondriacs

caption-reading as a question and doubtless appended by a copy editor—"Too Much Medi-cal News?" It was filled with basic truths, however, and, although occupying only a few inches of space, warrants close attention. Moreover, many read-

ers will heartily concur in the plea of its author, who perhaps differs from most of them, chiefly in having dared to express his disapprobation of a condition under which the majority suffer in uncomplaining silence and inward rebellion. "Can you not give us a little rest from doctors," he writes, "for at least a week or two?" To which he adds: "We, your readers, are so weary, oh, so very weary, of opening our papers mornings and finding them filled with medical events, column after column.'

! While this view may constitute a slight exaggeration, that it contains much truth is undeniable. Upon the slightest provocation, that is to say, long articles are inserted in the news columns of many papers detailing the incidents associated with some medical convention, or some new serum, or a proposal for so-called preventive medicine. That all of these "entertaining" articles are practically nothing else than deliberately projected propaganda makes no difference, apparently, to their acceptability so far as the newspapers are concerned. They make good copy, and so are run in full. That such a constant pouring into consciousness of teachings concerning the body and material methods of healing is likely to be fraught with disastrous consequences to the health of any nation in the midst of which it is permitted. is apparently ignored.

In this connection the correspondent sounds a warning which is no idle jest. He says:

A friend of mine from England who visited New York a few months ago said she had never been in a country where everybody was so continually talking of their illnesses. They either thought they were ill, or going to be ill, or had symptoms of illness, and were in constant-fear of epidemics. She said we had become a nation of hypochondriacs. Now, a nation of hypochondriacs is a weak nation, and unless we cease being obsessed with the idea that we must have a doctor at our elbow all the time we are going to cease being a strong nation.

Indeed, unless a halt is called upon this useless chatter about sickness and epidemics, operations and doctors, there is almost no telling where it will end. That it cannot be productive of good goes without saying, for good does not proceed from evil.

There is a series of articles being published at the present time in The Christian Science Monitor relative. to medical politics. These articles are not designed as an attack on any individual members of the medical profession, but to uncover the aggressive activities of medico-political propagandists. They show clearly that there is a vigorous attempt being made in America to bind upon the people of the Nation more closely than

ever before the superstitions and traditions of the medical teachings. That the newspapers are being utilized in this campaign is obvious to anyone who chooses to use his powers of observation to this end. Hence it behooves all who are awake to the danger to see to it that they take all possible steps to offset it whenever and wherever they see the opportunity.

THE very interesting article in the current World's Work, in which Postmaster-General New describes the

fight of the Post Office Department upon fraudulent promoters operating through the mails, will arouse varying reflections in the minds of readers. How different are the opinions held by those who have suffered through frauds promoted through the

Frauds and the Postal Service

Post Office is fairly indicated by two instances quoted, as follows, by the Postmaster-General:

A widow, for example, who had lost her entire savings in one of these "wildcat" promotions, wrote pathetically that she "never suspected that anyone would dare to use the United States mails to offer anything that was not safe and good." But a man who had bought first and investigated afterward expressed his feelings in a different way. He wrote that never again would he buy anything offered to him through the mails.

It is quite evident that both of these sufferers took an extreme view as to the responsibilities and the duties of the Post Office Department.

Perhaps it is a somewhat anarchistic view to take of this particular issue, and yet in some instances Mr. New's very entertaining story suggests that the sufferers really might better bear the penalty of their own offenses. We can hardly recall a more pleasing illustration of "The Mikado's" policy of making the punishment fit the crime than that furnished by the thirsty individual, eager to violate America's prohibition law, who sent \$18 to a Toronto advertiser in order that he might obtain "in sealed original packages, nothing added or taken away, Morgan's Pure Rye, unadulterated, 100% pure, at \$18 per case of 12 full quarts," When the shipment arrived he received fa case of 12 pasteboard cartons, quart size, of the ordinary rye berry," with full directions as to how it might be roasted and made serviceable as coffee. Somehow we could look with philosophy upon the lethargy of the Post Office Department which would permit individuals, who themselves strove to violate the law of their own land, to become the victims of swindlers operating from an adjacent country. The same rule might apply to patrons of certain German firms who are now flooding the United States with advertisements of preparations which can be used for the manufacture of all sorts of alcoholic drinks. In all probability trusting individuals who send their money in response to these solicitations will encounter the same disappointments as that which awaited the purchaser of the "Canadian Pure Rye."

Mr. New tells of medical frauds. There was, for example, a man in Wichita who received from \$12,000 to \$16,000 a month for selling, for \$5 an ounce, water which contained ten ounces of sugar and ten ounces of salt to a gallon, costing about 6 cents per gallon. Another notable medical fraud, who had fourteen remedies, all virtually identical, to cure fourteen different ills, took in about \$300,000 before the Post Office Department descended upon him. As yet, however, the various forms of serums which have received indorsement from portions of the medical profession do not seem to have attracted the attention of the alert officials of the Post Office.

THE present-day world's search for oil-than which no other detail is more noticeable in economic activities-

Holland Turns to Its Minerals

is only a phase of the work everywhere going forward in the direction of mineral development. Coal, copper, gold, silver, iron, lead, zinc, oil, all are more than merely needed; the demand is literally a "crying" one. Now comes the Nether-

lands to take its place beside the many states busied in such enterprise. For several years the Dutch Government has been making investigations with a view to establishing mineral production in its East Indies on a satisfactory basis, and within the month the Amsterdam Exchange has largely oversubscribed a loan for 65,000,-000 guilders, a considerable part of which is to go to this end. A similar offering for £5,000,000 is to be placed soon before British investors, and London financiers predict a cordial reception for it.

Two decades ago experts held the opinion that Java. Sumatra, et al., could never become mining countries in any generous content of the phrase. However, private enterprise went ahead prospecting, especially for oil and the precious metals, and with enough success to bring the annual export value in this class of products, just before the war, to some 75,000,000 guilders. The yearly output of these same Indies' mines now rises close to 50 per cent above anything known in those earlier days, while this object lesson, plus the needs of the post-war world, has led the Hague Administration into the work.

Of the petroleum production, nothing need be written; six continents know the wealth in this regard of the north and east coasts of Sumatra, the north coast of Java and the east of Borneo. As to coal, both lignite and "pit" are produced, of excellent quality, not only in the three isles just named, but, as well, in West New Guinea and South Celebes. Tin, the most important Indies metal, is worked largely in Banka. Wolfram is found in Biliton and Singkep, though only thus far in small quantity. Gas deposits of value have been located in Sumatra. The workings in gold, silver, platina, mercury, and phosphates are not considerable, as such figures usually go, though production better than pays for itself. All of which, save to a technically informed reader, has an undeniably encyclopædic sound, but, also, it all spells noteworthy advance, not only for the Netherlands' islands,

The traveler who once spoke of Holland (using the name solely in its European sense) as "a sort of pictur-

esque head-offices of a wonderful production works away out in the Orient," was saying something at once informal and informing. It is true he was slighting an immensely worth while record in art and letters, religious liberty and political freedom, social progress and world history, but, partial as it was, his comment emphasizes a large economic fact. If it is interesting as inferring much as to today's activities in the Pacific archipelago, surely it is promising, too, to current industrial effort the globe around.

It is surprising how quickly and radically business sentiment changes from the pessimistic to the optimistic,

or from a favorable to an un-favorable view. Often these changed viewpoints are without much foundation. The extreme sensitiveness of business is such as to permit a very slight development to change the entire drift of commercial thought. For

The Business Situation

example, the present business situation is entirely sound, and yet prognosticators are to be found who say that business is going to be very quiet during the coming months. If enough of them will keep on thinking it and saying it, the fear which they entertain may become widespread, and business will be just about as bad as they think it is going to be. However, some of the biggest business men of the United States, and economists who have studied the situation with great care, say that fundamentals are sound and that business should continue good throughout the remainder of the year at least.

A little more than a year and a half ago the United States was in the midst of a depression. Then business picked up suddenly and gathered momentum at a rapid rate. Prices soared and a veritable boom was on. Remembering the inflation of three or four years ago and its subsequent collapse, men of affairs undertook a few months ago to check the unnatural business torrent in order to avert another inflationary period with its untoward consequences. They succeeded in doing this to a degree. The pessimists then got busy, and have been talking depression ever since. They point to the recent slump in the stock market as an indication of what was to be expected in business in the next few months. However, they do not seem to remember that the stock market had been advancing for a period of nearly two years and was due for a reaction. Prices of many stocks had risen far above their real value. A large volume of new issues of stocks and bonds had been floated, but not fully absorbed by the investing public. The history of the stock market has been that after a long upward swing of prices a corresponding downward movement follows. There have been always what is known as "intermediary swings," but 'the general upward or downward trend otherwise has not been interrupted until the general movement had been completed.

Now the decline in stock market prices, which started a few months ago and which has gained considerable momentum recently, has frightened many people into thinking that a business depression is about to begin. Stock market price movements usually are regarded as barometric of future business conditions. It is to be remembered, however, that prices generally go higher in a bull movement and lower in a bear market than conditions justify. If men were more temperate in their activities, extremes, either in the stock market or the business world, would not need to be experienced. Prosperity would be prolonged, and there would be neither undue depression nor hysterical trade activity.

When many men are out of employment and wages are low, it is a pretty good indication of business depression. When there is practically no unemployment and wages are high, as is the case today, it must be concluded that business is good. A year and a half ago it was officially reported that about 6,000,000 men were out of work. The general complaint today is lack of workers. In the basic industries, such as iron and steel, orders on the books are sufficient to keep the plants going throughout the remainder of the year. Even though new business lately has not been coming in at the same rate as formerly, the prospects for future months are good. There are no grounds for fear. Its elimination would greatly help the situation.

Editorial Notes

THE discovery in Winchester Cathedral of what appears to be some portions of the stonework base of St. Swithin's Shrine, demolished by Cromwell's Commissioners at the Dissolution in 1538, will doubtless stimulate the recollection of many stories which have crystallized around the name of this one-time bishop. Nearly everyone has heard this doggerel, for instance:

> St. Swithin's day if thou dost rain For forty days it will remain; St. Swithin's day if thou be fair For forty days 'twill rain na mair.

The mere fact that its sentiment has been disproved times without number makes no difference. The myth it records dates back nearly a thousand years, and maybe it will still be popular 1000 years from now:

ALTHOUGH the least important of British subjects may, if he or she is willing to comply with the requisite regulations, sit in the public gallery of the House of Commons and listen to the debates, there is one Briton who is forever barred from such a privilege-the reigning sovereign. In this connection it is interesting to note that Queen Victoria, coming to the throne, when little more than a girl, as she did, never set her foot inside the House of Commons, and so perforce had to rely upon her imagination when thinking of the inside of that venerable building. The present King is somewhat better off in this respect, as he frequently used his privilege when Prince of Wales of attending sessions as an occupant of a seat in the distinguished strangers' gallery,

Northward Bound

DUBLIN, June 10 (Special Correspondence)—We are at Amiens Street Station, Dublin, and are getting into the Belfast train: "The luggage is in the 'hind van,' " says the porter, which remark, added to the words of the porter on the West Clare Railway, who asked the engine driver, "Have she water took? Well, drive with caution, for the signal's up a long time now," is yet another proof of my latest favorite theory about the Irish. They look on everything either as an animal or in its relation to ani

Before long we have left the amiable smokiness of Dublin, and are dashing up the coast to Belfast. Near Malahide we pass over the bridge which was blown up during the fighting, but which has since been repaired and protected by the Railway Protection Corps; and at Balbriggan we see the surflittered beach and the scattered sea breaking in lazily upon it. In an hour we are crossing the Boyne, and are pulling into Drogheda of the gray roofs and long streets. And so I come upon another of my favorite theories about Ireland: it is the country of old history books. I could take you to a second-hand bookshop in Dublin, where there are books on Irish history, from all possible points of view between bigotry and blarney, piled from floor to ceiling. If the Irish would go back to Cuchulain and the giants of Ulster, there might not be any objection; but they stop at Cromwell or William of Orangel As one passes over the Boyne at Drogheda, and as one looks down at the narrow and not too inspiring stream filtering through the town, one is more than ever forced to echo the cry of the man who said in despair, "Why can't they forget the Battle of the Boyne?"

One is tempted to moralize as the train leaves Drogheda, and to wonder what would have happened to poor old Emerson if he had tried to apply the rules laid down in his essay on "History" by writing a "History of Ireland." But the sight of a tufty field and a white horse with the wind in its mane sends the thought beyond moralizing. One takes out a book, and one's eye catches the line:

Come away, O human child,
To the woods and waters wild—
and, looking out of the window, it comes to one that buttercups, daisies, gorse, and spring clouds know nothing about jarring frontiers, the Battle of the Boyne notwithstanding.

In spite of these philosophizings, we have been noting our fellow passengers, and are secretly proud, being merely English, of our ability to distinguish northerners from southerners. The man with the almost raw complexion, the scattered mustache, blue eyes, and an indefinable kindliness of nose, is plainly from the south-Wicklow, we hazard, for he talks of nothing but horses. The burly man in the other corner, with the straight eyebrows and square chin, is a northerner. He is talking about gas engines, and his accent is unmistakable.

"Och, ay, it is! Man, it's a grand machine when ye know all about it. It happened Jamie McTawnish, who sold it me, took a turn and helped me one morning with it, and says he to me, 'Och, it's a great thing and easy in the working, and if it should catch at all, give it a wee, sma' kick,' says he; 'that's all.'" He looks a shrewd man, and might have come straight from the Auld Licht kirk in Kirriemuir, if our imagination and his accent are not misleading.

At Dundalk we leave Free State territory, and before Portadown our luggage is searched. Soon we are among the red manufacturing towns near Belfast. We pass large linen and thread mills. The train, belonging to the Great Northern, and apparently excited at being in the north once more, increases its speed, rattles over the points, and hums down cuttings, and seems to be drumming out the refrain, "Linen and thread, linen and thread, linen and thread," at a prodigious speed. A hundred factory chimneys, each with a haze of smoke about it, furiously red walls—that is Belfast as we background and a swarm of barefooted newsboys as, later on. we journey through Antrim, Ballymena, Ballymoney, and Coleraine to Londonderry, and so back into history.

For Londonderry has a siege, and city walls, and a royal charter, and a hundred and one other historical valuables which leave its inhabitants undecided as to whether they want to belong to the Free State or remain in the Six Counties. In Londonderry everything belongs to one party or another. If you ask a certain local editor there what he thinks of the weather, it is as likely as not he will blame it on William of Orange, and perorate in the manner immortalized in "General John Regan"—"So long as the Oirish people—"

+ + + The jarvey who takes us out of the town into Donegal to show us the frontier stations conducts a monologue, in discursive fashion, on the events of the day, and finds himself waist deep in politics before he has finished. He is more outspoken than his Dublin colleagues, and, as we rattle down the road on the way to the mountains, he points out all the houses which were attacked. "But things is a ful quiet now," he says, "and there's been no disturbances since the last time they caught a man over at Drumnacross. Well? Och, ay, it's an awful country. Sure, every horse is one side or t'other. What the country wants"—we pause, greatly excited—"is an a-micable settlement. Why wouldn't they leave the people alone? Man, I'm telling ye, the people was as black as crows on this road on Sundays, from five till eleven in the evenings, afore the troubles began. An now, with the curfew, if ye see

a wee, sma' customs man you'll be lucky."

Then he talks about himself, and once more my favorite theory about the Irish and history is proved.

"I always have and always will stand by John Redmond. Man, he was great," says her "But there is no John Redmond to support now," say I.

"Isn't it too late?" "Not at all!" says the jarvey.

And so we pass through the Six Counties boundary post, sandbagged in redoubt fashion, and the guard picks up his rifle and strolls out of the hut to see us go through. At the Free State post, which consists of a hut and a pole across the road, the officer cries in rich tones, "Have ye no luggage at all?"
"We have not," we say, and pass through unsearched and

The Root Cause of Nearly Every War

DURING the World War a well-known French publicist was invited to address a large audience of children from the elementary schools of an American city. Walking quickly on to the stage, he commenced speaking in his own tongue and then smiling at the bewildered children, he said, in perfect English, "You do not understand me, do you? There, my dear children, you have the root cause of this and nearly every other war. Only through a lack of proper understanding of the point of view of other nations are wars possible."
